4. SETUP AND INSTALLATION

4.1 Vehicle Compatibility

This Android Navigation Stereo is compatible with Toyota Sienna models manufactured between 2010 and 2014.

4.2 Important Installation Note (CANBUS)

Kindly NOTE:

- If your car has an **ORIGINAL AMPLIFIER**, you must purchase a CANBUS decoder separately. Without a CANBUS, the unit will produce no sound.
- Typically, if your car features a large colorful screen or factory navigation, it indicates the presence of an amplifier.
- For information on obtaining the correct CANBUS, please refer to the product's model options on the website.

Kindly NOTE:

- If there's ORIGINAL AMPLIFIER on your car, please purchase CANBUS separately, otherwise it will NO SOUND.
- Normally if your car has large colorful screen/factory navigation, it means the car has AMP.
- Q: How to get the CANBUS
A: Plz check the website Image's right side –model option

6. MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the screen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **Software Updates:** Periodically check for software updates through the unit's settings menu or the manufacturer's website to ensure optimal performance and access to new features.
- **General Care:** Keep the unit free from dust and debris. Avoid spilling liquids on the device.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound from the unit.	Missing or incorrect CANBUS connection if the car has an original amplifier.	Ensure a CANBUS decoder is installed if your vehicle has a factory amplifier. Check all audio connections.
Navigation not working or slow.	No GPS signal, outdated maps, or slow internet connection (for online navigation).	Ensure GPS antenna is properly connected and has a clear view of the sky. Update navigation maps. Connect to a stable Wi-Fi network for online services.
Steering wheel controls not functioning.	Incorrect wiring or unconfigured settings.	Verify wiring connections for steering wheel control. Access the unit's settings to configure or calibrate the steering wheel controls.
Bluetooth pairing issues or music not playing.	Device not in pairing mode, interference, or software glitch.	Ensure your phone's Bluetooth is on and discoverable. Restart both the stereo and your phone. Try pairing again. Check if other apps are interfering with Bluetooth music playback.
Touchscreen freezes or is unresponsive.	Temporary software issue.	Restart the unit by pressing and holding the power button or by turning off the vehicle's ignition and restarting.
