SETUP AND INSTALLATION

This unit is designed for easy installation, allowing you to quickly set up and enjoy a cooler home. The exhaust hose, window kit, and all necessary instructions are included. No additional tools are typically needed for assembly.

Window Kit Assembly

The adjustable window brackets fit window openings from 19.4" to 62.2". Attach the 5-foot exhaust hose to the unit and then to the window slider adapter for proper ventilation.

OPERATING THE UNIT

The Midea portable air conditioner offers multiple operating modes and convenient control options for personalized comfort.

Modes of Operation

- **Cool Mode:** Provides powerful cooling for your room.
- **Dehumidifier Mode:** Reduces moisture in the air, ideal for humid environments.
- **Fan Mode:** Circulates air without cooling, offering three fan speeds (Low, Mid, High).

Convenient Mobility

This Air Conditioner features four wheels and handles to easily roll the unit to the preferred cooling area.

Easy To Clean

Preserve air quality with our washable & reusable filter. It protects your family and living space from dust and pet hairs.

Easy Installation

Install the Adjustable window brackets (fits window openings from 19.4" – 62.2" and attach the 5 ft hose to get cooling. An exhaust hose and window kit are included, not additional tools are needed.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your Midea portable air conditioner.

Washable Air Filter

The unit features a removable and washable air filter that helps protect your living space from dust and pet hairs. The clean filter indicator on the control panel will illuminate when it's time to clean the filter.

Figure 6: The reusable air filter being cleaned under running water, a simple process to maintain air quality.

Water Drainage

During dehumidification or prolonged cooling in humid conditions, water may collect in the unit. Periodically, you may need to drain this water. Locate the drain cap at the bottom rear of the unit, place a shallow pan or towel underneath, and remove the cap to allow water to drain. Re-secure the cap tightly after draining.

TROUBLESHOOTING

If you encounter issues with your unit, refer to the following common troubleshooting tips:

- **Unit not cooling or blowing air:** Ensure the exhaust hose is properly connected and sealed to the window kit. Check if the air filter is clean; a clogged filter can restrict airflow. Verify the power cord is securely plugged into a working outlet.
- **Unusual noises:** A slight rattling or humming sound can be normal during operation. However, if the noise is excessive or

unusual, check for any obstructions around the unit or ensure it is placed on a flat, stable surface.

- **Remote control not working:** Check the batteries in the remote control and replace them if necessary. Ensure there are no obstructions between the remote and the unit's sensor.

For more detailed troubleshooting or persistent issues, please consult the full User Manual PDF available in the support section or contact Midea customer support.
