Ariete 413-05

Ariete Vintage 413 Citrus Juicer User Manual

Model: 413-05

Brand: Ariete

Product Overview

The Ariete Vintage 413 Citrus Juicer is designed for efficient and effortless extraction of fresh citrus juices. Featuring a robust motor and a convenient lever mechanism, it simplifies the juicing process. The appliance includes two different sized cones to accommodate various citrus fruits, from small limes to large grapefruits, ensuring maximum juice yield. Its vintage design adds a touch of elegance to any kitchen.

Setup and Assembly

Unpacking

Carefully remove all components from the packaging. Retain the packaging materials for future storage or transport. Ensure all parts are present before proceeding.

Component Identification

Image: An exploded view showing the main body, large cone, small cone, filter, and juice collection container.

- Main Unit with Motor Base and Lever
- Large Juicing Cone (Stainless Steel)
- Small Juicing Cone (with pin)
- Filter/Strainer
- Juice Collection Container
- Drip-Free Spout

Initial Cleaning

Before first use, wash all removable parts (cones, filter, collection container) with warm soapy water. Rinse thoroughly and dry completely. Wipe the main unit with a damp cloth. Do not immerse the main unit in water.

Assembly Steps

1. Place the main unit on a stable, flat surface.
2. Insert the juice collection container into the main unit.
3. Place the filter/strainer on top of the collection container.
4. Select the appropriate juicing cone (large for oranges/grapefruits, small for lemons/limes) and place it onto the spindle in the center of the filter. Ensure it is securely seated.
5. Ensure the drip-free spout is in the closed (upward) position before juicing.

Operating Instructions

Preparing the Fruit

Cut citrus fruits in half across the middle. For best results, use fresh, ripe fruits. The juicer is designed to handle various sizes of citrus fruits effectively.

Juicing Process

Image: The juicer actively extracting juice from an orange half, with juice flowing into a glass.

1. Plug the power cord into a suitable electrical outlet (220 Volts).
2. Place a cut fruit half onto the juicing cone.
3. Lower the lever handle firmly onto the fruit. The motor will automatically activate upon pressure.
4. Apply steady, even pressure to extract the juice. The powerful 400-watt motor ensures efficient juicing.
5. Once juicing is complete, lift the lever handle. The motor will stop.
6. Repeat for remaining fruit halves.

Using the Cones

The juicer comes with two interchangeable cones:

- **Large Cone:** Made of stainless steel, ideal for larger fruits like oranges and grapefruits.
- **Small Cone:** Equipped with a pin to securely hold and juice smaller fruits such as lemons and limes.

Image: A detailed view highlighting the juicer's lever, the drip-free spout, and the two different sized juicing cones.

Drip-Free Spout

The integrated drip-free spout prevents mess and juice wastage. After juicing, simply push the spout downwards to allow the juice to flow into your glass or container. When finished, push it back up to stop the flow and prevent drips.

Care and Maintenance

Cleaning

For optimal performance and hygiene, clean the juicer after each use.

- Unplug the appliance from the power outlet before cleaning.

- Remove the juicing cone, filter, and juice collection container.
- These removable parts are dishwasher safe for convenient cleaning. Alternatively, wash them by hand with warm soapy water and a soft brush. Rinse thoroughly.
- Wipe the main unit and motor base with a damp cloth. Do not use abrasive cleaners or immerse the main unit in water.
- Ensure all parts are completely dry before reassembling or storing.

Storage

Store the juicer in a clean, dry place when not in use. Ensure the power cord is neatly wrapped and not kinked. Keep out of reach of children.

Troubleshooting

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; no power; insufficient pressure on lever.	Ensure power cord is securely plugged in. Check power outlet. Apply firm, consistent pressure to the lever.
Low juice yield.	Fruit not ripe; incorrect cone size; insufficient pressure.	Use ripe fruits. Ensure the correct cone (large/small) is used for the fruit size. Apply firm pressure.
Juice leaks from spout.	Spout not in closed position.	Ensure the drip-free spout is pushed fully upwards to close it when not dispensing juice.
Motor stops during operation.	Overheating; excessive pressure.	Allow the unit to cool down for 15-20 minutes. Reduce pressure applied to the lever.

Technical Specifications

Feature	Detail
Brand	Ariete
Model Number	413-05
Color	Blue
Product Dimensions	17.5 x 24.5 x 29 cm
Item Weight	1.16 Kilograms
Capacity	0.6 Liters
Power / Wattage (Nominal)	85 watts
Maximum Power	400 Watts
Voltage	220 Volts

Feature	Detail
Material	Metal
Noise Level	44 dB
Special Features	Vintage Ariete Line, Drip-Free Spout, 2 Cones
Product Care Instructions	Dishwasher Safe (removable parts)

Warranty and Support

This Ariete product is covered by a manufacturer's warranty. For specific warranty terms, duration, and conditions, please refer to the warranty card included with your purchase or contact the retailer from whom you purchased the product. Keep your proof of purchase for warranty claims.
For technical support, spare parts, or service inquiries, please contact Ariete customer service or an authorized service center in your region. Contact details can typically be found on the manufacturer's official website or in the product packaging.
