2. SAFETY INFORMATION

WARNING: Failure to follow these warnings and instructions could result in serious injury or death.

Ensure proper assembly according to the provided instructions and tools. Be aware of potential pinch points, especially on the stairs. Do not exceed the maximum weight capacity of 200lbs per bed. Inspect the bed regularly for any signs of instability or damage. Keep the area around the bed free from obstructions to prevent accidents. This product is not intended for use by children under 6 years of age. For specific warnings related to maintenance and use, consult the user manual or contact the manufacturer.

- Always use the recommended mattress size to prevent gaps.
- Ensure all connections are tight before use.
- Do not allow children under 6 years of age on the upper bunk.
- Prohibit horseplay on or under the bed.

- Always use the stairway for access to the upper bunk.
- Periodically check and ensure that the guardrail, ladder, and other components are in their proper position and free from damage.

3. PRODUCT FEATURES

- **Detachable Design:** The twin over twin bunk bed can be separated into one twin size daybed and one twin size platform bed with a trundle.
- **Integrated Storage:** Three compartments of varying sizes are built into the stairway, ideal for storing quilts, bed sheets, books, and toys.
- **Durable Construction:** Crafted from solid pine wood and plywood for enhanced durability and safety.
- **Slatted Support:** Features wood slats for increased weight capacity, eliminating the need for a box spring.
- **Safe Access:** A built-in stairway replaces a traditional ladder, providing safer and easier access to the top bunk.
- **Enhanced Safety:** The upper bunk includes a full-length guardrail, while the bottom bunk has both a headboard and footboard. Solid pine legs provide additional strength and stability.

4. SETUP AND ASSEMBLY

Assembly of this bunk bed is required. Please follow the clear instructions provided in the separate assembly manual and use the included tools. It is recommended to have two adults for assembly.

4.1 Unpacking and Inspection

Carefully unpack all components and verify against the parts list in your assembly manual. Note that the product may arrive in two separate packages, which might not be delivered simultaneously. Inspect all parts for any damage before beginning assembly. Do not proceed with assembly if any parts are damaged or missing; contact customer service immediately.

4.2 Assembly Steps

Refer to your dedicated assembly manual for step-by-step instructions. Ensure all bolts and screws are tightened securely but do not overtighten to avoid stripping the wood. Pay close attention to the orientation of each piece as indicated in the diagrams.

5. OPERATING INSTRUCTIONS

5.1 Using the Bunk Bed

The bunk bed is designed for two twin-sized mattresses. Ensure mattresses are of appropriate thickness to maintain guardrail height on the upper bunk. The maximum weight capacity for each bed is 200 lbs.

5.2 Trundle Bed Operation

The trundle bed is located beneath the lower bunk and can be pulled out for an additional sleeping space. It accommodates a twin-sized mattress. When not in use, push the trundle back under the bed to save space.

5.3 Storage Stairway Use

The built-in stairway provides safe access to the upper bunk. Each step also functions as a storage compartment. Utilize these compartments for organizing bedding, books, or small items.

5.4 Detaching the Bunk Bed

To convert the bunk bed into a twin daybed and a twin platform bed with trundle, carefully follow the disassembly instructions in your assembly manual. This process typically involves removing the connecting hardware between the upper and lower bunks.

6. MAINTENANCE

6.1 Cleaning

For general cleaning, wipe the wood surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish. For specific care of the wood finish, "Dry Clean Only" is recommended, which typically refers to professional cleaning for upholstered items, but for wood, it implies avoiding water-based cleaning solutions that could warp or damage the wood. Use wood-specific cleaning products if necessary.

6.2 Regular Inspection

Periodically (e.g., monthly or quarterly) check all bolts, screws, and connections to ensure they remain tight. Retighten any loose hardware to maintain the bed's stability and safety. Inspect the slats, guardrails, and stairway for any signs of wear,

cracks, or damage. Replace any damaged parts immediately.

7. TROUBLESHOOTING

7.1 Loose Connections

If the bed feels wobbly or unstable, check all assembly hardware. Use the included tools to tighten any loose bolts or screws. Do not overtighten.

7.2 Trundle Rollers Malfunction

If the trundle rollers are not functioning smoothly or appear to be breaking, inspect them for obstructions or damage. Ensure the trundle is properly aligned within its track. If rollers are broken, contact customer service for replacement parts.

7.3 Scratches or Marks on Finish

Wood furniture can be susceptible to scuffs and marks. For minor scratches, touch-up pens or furniture polish designed for pine wood can be used. For deeper damage, professional repair may be necessary.

7.4 Missing Parts

If you discover any missing parts during assembly, do not attempt to substitute with other hardware. Contact P PURLOVE customer service immediately for assistance.
