- Maximize your coverage with innovative A.I. Position Detection that tracks brushing across all 3 surfaces of your teeth.
- Benefit from personalized guidance to improve brushing habits in just 1 week.
- Utilize 7 clean modes and an interactive color display to track brushing time and celebrate your cleaning achievements.

Safety Information

Do not use this product for purposes other than oral hygiene. Be gentle while brushing to protect your gums and enamel. Follow the personalized guidance for optimal use.

Setup & Initial Use

To begin using your Oral-B iO Series 9 Electric Toothbrush, ensure it is fully charged. Attach a brush head and apply toothpaste. The interactive display will guide you through initial settings.

Directions for Use

Apply toothpaste to the brush head, press the power button to turn it on, select a brushing mode, and guide the brush head along all surfaces of the teeth for the recommended brushing time. The Smart Pressure Sensor will indicate if you are brushing too hard or too soft.

Operating Your Toothbrush

The Oral-B iO Series 9 offers a personalized brushing experience with multiple modes and intelligent feedback.

Brushing Modes

Select from 7 distinct cleaning modes to suit your needs:

- **Daily Clean:** For everyday plaque removal.
- **Sensitive:** Gentle cleaning for sensitive areas.
- **Gum Care:** Massages gums for improved gum health.
- **Intense:** For a powerful clean, targeting stubborn plaque.
- **Whiten:** Designed to remove surface stains for whiter teeth.
- **Super Sensitive:** Extra gentle for extremely sensitive teeth and gums.
- **Tongue Clean:** For fresh breath and overall oral hygiene.

Smart Pressure Sensor

The toothbrush features a Smart Pressure Sensor with a light ring. It illuminates red if you brush too hard, white if too soft, and green when applying the optimal pressure. This visual feedback helps protect your gums and enamel.

Maintenance

Proper maintenance ensures the longevity and effectiveness of your Oral-B iO Series 9 toothbrush.

Brush Head Replacement

Replace your Oral-B iO Series Replacement Brush Heads every 3 months for best results. The toothbrush display will provide an alert when it's time for a change.

Cleaning

After each use, rinse the brush head thoroughly under running water. It is recommended to rinse the brush head and main unit with warm water and allow it to air dry. Store the toothbrush in a dry area, especially when charging, to prevent mold buildup. Avoid poking sharp objects into the rubber seal at the top of the

brush handle, as this can damage the electronics.

Troubleshooting

Encountering issues with your toothbrush? Here are some common concerns and solutions.

Battery Life

The Oral-B iO Series 9 battery typically lasts up to 60 days on a full charge, depending on the selected brushing mode. High-intensity modes may reduce battery life. If the battery is not holding a charge, ensure the toothbrush is properly seated on the charger. A full charge usually takes 2-3 hours.

Pressure Sensor Issues

If the pressure sensor is not responding as expected (e.g., constantly red or white), ensure the brush head is correctly attached and that you are applying appropriate pressure. The app can provide real-time feedback to help calibrate your brushing technique.
