2. PRODUCT OVERVIEW

The Arama USB Headset Model USB200 features optimized wideband audio technology, Digital Signal Processing (DSP), and a noise-cancelling microphone to ensure crisp and clear sound quality, even in noisy environments. Its comfort-tested design includes skin-friendly ear pads and a lightweight build for extended wear.

Key Features:

- **Noise-Cancelling Microphone:** Reduces background noise for clear voice transmission.
- **Wideband Audio:** Provides high-quality sound for calls and multimedia.
- **Comfort-Tested Design:** Lightweight with soft, skin-friendly ear pads for prolonged use.
- **Inline Controls:** Easy access to volume adjustment and microphone mute functions.
- **Durable Construction:** Built with sturdy materials and a 5.3ft long cord for flexibility.
- **Wide Compatibility:** Supports Windows, Mac OS X, and various UC platforms.

3. PACKAGE CONTENTS

- Arama USB Headset
- USB Cable (integrated)

- User Manual (this document)

4. SETUP GUIDE

4.1 Connecting the Headset

1. Locate an available USB port on your computer (PC, Laptop, Mac, Desktop).
2. Plug the USB connector of the headset into the USB port.
3. The operating system will automatically detect and install the necessary drivers. No additional software installation is required.

Figure 2: Headset connected to a laptop via USB.

4.2 Initial Audio Configuration

After connecting, ensure the headset is selected as the default audio input and output device in your computer's sound settings and within your communication applications (e.g., Skype, Zoom, UC platforms).

Your browser does not support the video tag.

Video 1: This video demonstrates the connection process of the Arama USB Headset to a computer and highlights its plug-and-play functionality.

5. OPERATING INSTRUCTIONS

5.1 Adjusting the Headset for Comfort

- **Headband Adjustment:** The headband is adjustable to fit various head sizes. Gently extend or retract the headband until it rests comfortably on your head.
- **Microphone Positioning:** The microphone arm is rotatable and flexible. Position the microphone approximately 1-2 inches from your mouth for optimal voice pickup.
- **Ear Cushion Rotation:** The ear cushion can rotate for comfortable wearing on either ear.

Video 2: This video illustrates how to adjust the headset's headband and microphone for a comfortable and optimal fit.

5.2 Using Inline Controls

The headset features an inline control unit for convenient management of calls and audio.

- **Volume Up (+):** Press to increase the listening volume.
- **Volume Down (-):** Press to decrease the listening volume.
- **Microphone Mute:** Press the microphone button to mute or unmute your microphone. An indicator

light on the control unit will show the microphone status.

CONVENIENT IN-LINE CONTROLS

6. COMPATIBILITY

The Arama USB Headset is widely compatible with various operating systems and communication platforms:

- **Operating Systems:** Windows 2000/7/8/10/XP/Vista, Mac OS X.
- **Compatible Devices:** Tablets, Computers, Laptops, Desktops.
- **Platforms:** Most leading UC Platforms, Softphone applications (e.g., Skype, Zoom).
- **Specific Uses:** Online classes, online meetings, call centers, business offices.

7. MAINTENANCE AND CARE

- Keep the headset clean by wiping it with a soft, dry cloth.
- Avoid exposing the headset to extreme temperatures, moisture, or direct sunlight.
- Do not attempt to disassemble or modify the headset, as this may void the warranty.
- Store the headset in a safe place when not in use to prevent damage to the cable or microphone.

8. TROUBLESHOOTING

8.1 No Sound or Microphone Not Working

- Ensure the USB connector is securely plugged into your computer.
- Check your computer's sound settings to confirm the Arama USB Headset is selected as the default playback and recording device.
- Verify that the microphone is not muted using the inline control button.
- Test the headset with a different USB port or another computer to rule out port or system issues.

8.2 Poor Audio Quality

- Adjust the volume using the inline controls or your computer's system volume.
- Ensure the microphone is positioned correctly, about 1-2 inches from your mouth.
- Check for any physical damage to the cable or connectors.
