- User Manual

3. SETUP GUIDE

3.1 Connecting the Mouse

Connect the USB cable of the TECKNET Wired Gaming Mouse to an available USB port on your computer. The mouse is plug-and-play, and your operating system should automatically detect and install the necessary basic drivers.

3.2 Driver and Software Installation

For full functionality, including DPI range updates and button customization, it is recommended to download and install the official driver software. Visit the official TECKNET website and navigate to the support section for model EGM01793BA01 to download the latest software.

3.3 Compatibility

The TECKNET Wired Gaming Mouse is compatible with various operating systems, including Windows XP, Windows Vista, Windows 7, Windows 8, and Windows 10. It also supports Mac systems.

Compatible with Windows XP/Vista/Win 7/Win 8/Win 10

4. OPERATING INSTRUCTIONS

4.1 DPI Adjustment

The mouse features an adjustable DPI range from 250 to 8000 DPI. Use the dedicated DPI buttons (typically located behind the scroll wheel) to cycle through different DPI settings. Each DPI setting may correspond to a different LED color for quick visual identification.

4.2 Programmable Buttons

The mouse is equipped with 11 programmable buttons. These buttons can be customized using the official software to perform various functions, macros, or key combinations. One notable feature is the 'Fire Button', which can be configured for rapid multi-click actions (e.g., one click equals three left clicks).

Brand	TECKNET
Color	Black
Connectivity Technology	Wired (USB)
Movement Detection Technology	Optical

DPI Range	250 - 8000 DPI
Programmable Buttons	11
RGB Backlight Modes	8
Durability	Up to 50 Million Clicks

6. MAINTENANCE

To ensure optimal performance and longevity of your TECKNET Wired Gaming Mouse, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the mouse. For stubborn dirt, a slightly damp cloth can be used, ensuring no moisture enters the internal components. Avoid harsh chemicals or abrasive cleaners.
- **Sensor Care:** Keep the optical sensor on the underside of the mouse clean and free from dust or debris to maintain accurate tracking.
- **Cable Management:** Avoid sharp bends or excessive pulling on the USB cable to prevent damage.

7. TROUBLESHOOTING

If you encounter issues with your TECKNET Wired Gaming Mouse, refer to the following common troubleshooting steps:

- **Mouse Not Responding:**
 - Ensure the USB cable is securely connected to your computer.
 - Try connecting the mouse to a different USB port.
 - Test the mouse on another computer to determine if the issue is with the mouse or the computer.
- **Inaccurate Tracking or Lag:**
 - Clean the optical sensor on the bottom of the mouse.
 - Ensure you are using the mouse on a suitable surface (e.g., a mouse pad).
 - Adjust the DPI setting to a lower value if the cursor is too sensitive.
- **LED Lights Not Working or Flickering:**
 - Check the RGB backlight mode settings via the mouse button or software.
 - Ensure the mouse is properly connected and receiving power.
- **Software Installation Issues:**
 - Download the software only from the official TECKNET website to avoid compatibility or security issues.
 - Temporarily disable antivirus software during installation if it interferes.

8. WARRANTY AND SUPPORT

TECKNET is committed to providing quality products and professional service. For warranty information, technical support, or further assistance, please visit the official TECKNET website or contact their customer service department. Keep your purchase receipt for warranty claims.
