EZCast V3

EZCast V3 Portable Projector User Manual

Introduction

This manual provides detailed instructions for setting up, operating, and maintaining your EZCast V3 Portable Projector. Please read this manual thoroughly before using the device to ensure optimal performance and longevity.

Setup

1. Unboxing and Initial Inspection

Upon opening the package, verify that all components are present and undamaged. The standard package includes the EZCast V3 Projector, a power adapter, a remote control, and this user manual.

This video demonstrates the unboxing process of the EZCast Beam V3 projector, showing the contents included in the package.

2. Physical Connections

The EZCast V3 projector offers multiple connectivity options.

- **HDMI Port:** Connect to laptops, gaming consoles (PS5, Xbox), TV sticks, or other HDMI-enabled devices.
- **USB Port:** Connect USB drives for media playback or power external devices.
- **Micro SD Card Slot:** Insert a Micro SD card for direct media playback.
- **Audio Jack (3.5mm):** Connect external speakers or headphones.

Connecting HDMI Devices

To connect a device via HDMI, simply plug one end of an HDMI cable into the projector's HDMI port and the other end into your source device (e.g., PS5, laptop). Select the HDMI input source on the projector's menu.

This video demonstrates connecting the EZCast Beam V3 projector to a PlayStation 5 console using an HDMI cable for gaming.

3. Powering On and Basic Adjustments

Connect the power adapter to the projector and a power outlet. Press the power button on the projector or remote control to turn it on.

Focus and Keystone Correction

Adjust the focus ring on the projector lens until the image is clear. Use the remote control or the projector's control panel to perform keystone correction, which adjusts the image shape to be rectangular if the projector is not perfectly

perpendicular to the screen.

Image: Illustration of the focus adjustment dial on the projector and the keystone correction options available via remote or control panel.

4. Wireless Connection Setup

The EZCast V3 supports 5GHz/2.4GHz WiFi connections for wireless screen mirroring from iOS and Android devices. A 5G WiFi adapter is included.

1. Ensure the included 5G WiFi adapter is connected to the projector's designated port.
2. Power on the projector and navigate to the main menu.
3. Select the "Wireless" or "EZCast" option.
4. Connect the projector to your home WiFi network (both your device and the projector must be on the same network).
5. On your mobile device (iOS or Android), activate the screen mirroring function (e.g., AirPlay for iOS, Smart View/Miracast for Android).
6. Select the projector's name (e.g., "BeamV3-XXXX") from the list of available devices.

Operating Instructions

1. Connecting Various Devices

The EZCast V3 projector is compatible with a wide range of devices, including smartphones, tablets, laptops, USB drives, PS5, Xbox, Switch, and TV sticks.

Image: Diagram illustrating the flexible connection options for the EZCast V3 projector.

2. Media Playback and Streaming

Direct Media Playback

Insert a USB drive or Micro SD card into the respective port. The projector's interface will allow you to browse and play supported media files (videos, photos, audio).

Streaming Services

For streaming content from platforms like Netflix, Disney+, Prime Video, and Hulu, a separate TV stick (e.g., Fire TV Stick, Roku, Chromecast) is required due to copyright restrictions. Connect the TV stick to the projector's HDMI port.

Image: Visual representation of using TV sticks with the EZCast V3 projector to access popular streaming services.

YouTube TV and TikTok

The projector is fully compatible with YouTube TV and supports Airplay, Miracast, and DLNA protocols. It also features a unique portrait mode projection, allowing for a full-screen display of vertical mobile video apps like TikTok.

Your browser does not support the video tag.

This video highlights the versatility of the EZCast Beam V3 projector for various home entertainment scenarios, including portrait mode for mobile content.

3. Audio Output

The projector has a built-in speaker for audio output. For enhanced sound, connect external speakers or headphones via the 3.5mm audio jack or use Bluetooth connectivity.

4. Optimal Viewing Experience

For the best viewing experience, a projection distance of 3.9ft to 16ft is recommended, yielding an optimal screen size of 80-100 inches, with a maximum projection size of 150 inches.

This video showcases the EZCast Beam V3 projector's performance during gaming, highlighting its 120Hz refresh rate for smooth motion.

Maintenance

1. Cleaning

Regularly clean the projector lens with a soft, lint-free cloth. For the projector body, use a dry or slightly damp cloth. Avoid using abrasive cleaners or solvents.

2. Ventilation

Ensure the projector's ventilation openings are clear and unobstructed during operation to prevent overheating. Do not place the projector on soft surfaces that may block airflow.

3. Lamp Life

The LED lamp in your EZCast V3 projector has an estimated operating life of over 30,000 hours, providing long-term performance without frequent lamp replacement.

Troubleshooting

If you encounter issues with your EZCast V3 projector, please refer to the following common solutions:

- **No Image:** Check power connections, ensure the correct input source is selected, and verify that the source device is powered on and outputting a signal. Adjust focus and keystone.
- **No Sound:** Check volume settings on both the projector and the source device. Ensure external speakers/headphones are properly connected if used.
- **Blurred Image:** Adjust the focus ring. Ensure the projection surface is flat and the projector is within the recommended throw distance.
- **Wireless Connection Issues:** Ensure both the projector and your mobile device are connected to the same 5GHz or 2.4GHz WiFi network. Restart both devices and try reconnecting.
- **Remote Control Not Working:** Check battery levels and ensure there are no obstructions between the remote and the projector's IR receiver.

For further assistance, please contact EZCast customer support.

Specifications

Feature	Detail
Brand	EZCast
Model Name	V3
Recommended Uses	Home Cinema
Connectivity Technology	Bluetooth, HDMI, USB, 5G WiFi Adapter
Display Resolution	1920 x 1080 (1080P Full HD Supported)
