YATTICH YT-191

YATTICH YT-191 Paint Sprayer Accessories User Manual

Model: YT-191

1. Introduction

This manual provides essential information for the proper use, maintenance, and care of your YATTICH YT-191 Paint Sprayer Accessories. These accessories are specifically designed as replacement or supplementary parts for the YATTICH YT-191 paint sprayer model. Please read this manual thoroughly before using the accessories to ensure optimal performance and longevity.

2. Package Contents

Please verify that all items listed below are included in your package. If any items are missing or damaged, please contact customer support.

- 1x Front Body (Black)
- 1x 1000ml Container
- 1x Pot Lid
- 5x Copper Nozzles (Sizes: 1.2mm, 1.5mm, 1.8mm, 2.5mm, 3.0mm)
- 1x Nozzle Cleaning Needle
- 1x Cleaning Brush
- 1x Spanner

Figure 1: Included Accessories. This image displays all components included in the YATTICH YT-191 paint sprayer accessory kit. It features the main front body of the sprayer, a large 1000ml container with its lid, a set of five different sized copper nozzles for various spray patterns, and essential cleaning tools including a nozzle cleaning needle, a cleaning brush, and a spanner for assembly and disassembly.

3. Setup and Assembly

These accessories are designed for easy integration with your YATTICH YT-191 paint sprayer.

3.1 Attaching the Front Body

1. Ensure the main sprayer unit is unplugged and free of any paint residue.
2. Align the new front body with the main motor housing of the YT-191 sprayer.
3. Twist the front body clockwise until it is securely fastened. Do not overtighten.

3.2 Attaching the Container

1. Ensure the container is clean and dry before filling.
2. Fill the 1000ml container with your desired paint or coating material. Do not overfill.
3. Screw the filled container onto the bottom of the front body. Ensure a tight seal to prevent leaks.

3.3 Selecting and Installing Nozzles

Choose the appropriate nozzle size based on the viscosity of your material and desired spray pattern.

- **Smaller Nozzles (e.g., 1.2mm, 1.5mm):** Ideal for thinner materials like stains, sealers, and lacquers, providing a finer finish.
- **Medium Nozzles (e.g., 1.8mm, 2.5mm):** Suitable for general-purpose paints, latex paints, and primers.
- **Larger Nozzles (e.g., 3.0mm):** Best for thicker materials like latex paints, chalk paint, or when a faster application is desired.

1. Unscrew the existing nozzle cap from the front body.
2. Insert the chosen copper nozzle into the nozzle cap.
3. Screw the nozzle cap with the installed nozzle back onto the front body until secure. Use the provided spanner if needed, but avoid excessive force.

4. Operating Guidelines (Accessory Specific)

These guidelines pertain to the accessories. For full operating instructions of the paint sprayer, refer to your YATTICH YT-191 main manual.

4.1 Container Use

- Always ensure the pot lid is securely tightened when transporting or storing paint in the container separately.
- Do not use the container for highly corrosive or flammable liquids not intended for paint sprayers.
- The 1000ml capacity allows for longer spraying sessions without frequent refills.

4.2 Nozzle Performance

- Regularly check nozzles for wear or damage. Worn nozzles can lead to an inconsistent spray pattern.
- Always perform a test spray on a scrap piece of material to ensure the chosen nozzle and paint viscosity provide the desired finish.

5. Maintenance and Cleaning

Proper cleaning and maintenance of your accessories will extend their lifespan and ensure consistent performance.

5.1 Cleaning the Container and Pot Lid

1. Empty any remaining paint from the container.
2. Rinse the container and lid thoroughly with the appropriate cleaning solution (water for latex, mineral spirits for oil-based paints).
3. Use the cleaning brush to scrub away any stubborn paint residue from the inside of the container and around the lid's threads.
4. Rinse again and allow to air dry completely before storage.

5.2 Cleaning Nozzles

1. Remove the nozzle from the front body.
2. Soak the nozzle in the appropriate cleaning solution for a few minutes to loosen dried paint.
3. Use the nozzle cleaning needle to carefully clear any blockages from the nozzle opening. Do not use metal objects that could damage the nozzle.
4. Use the cleaning brush to scrub the exterior and interior of the nozzle.
5. Rinse thoroughly and ensure the nozzle is completely clear before drying and storing.

5.3 Cleaning the Front Body

1. Disconnect the front body from the main sprayer unit.
2. Remove the nozzle and container.
3. Rinse all paint contact surfaces with the appropriate cleaning solution.
4. Use the cleaning brush to remove any paint from the suction tube and internal passages.
5. Ensure all parts are free of paint residue and dry completely before reassembly or storage.

6. Troubleshooting (Accessory Related)

Problem	Possible Cause	Solution
Nozzle Clogging	Dried paint in nozzle, paint too thick.	Clean nozzle thoroughly with cleaning needle and brush. Thin paint according to manufacturer's recommendations.
Container Leakage	Container not tightened properly, damaged threads, missing seal.	Ensure container is securely screwed onto the front body. Inspect threads for damage. If damaged, replace the container.
Inconsistent Spray Pattern	Partially clogged nozzle, incorrect nozzle size for material, worn nozzle.	Clean nozzle completely. Select appropriate nozzle size for paint viscosity. Replace nozzle if worn.

7. Specifications

Brand	YATTICH
Model (Accessories For)	YT-191
Container Volume	1000ml (1 Liter)
Nozzle Material	Copper
Nozzle Sizes Included	1.2mm, 1.5mm, 1.8mm, 2.5mm, 3.0mm
Main Material (Container/Front Body)	PP (Polypropylene)
