3. Software Installation

For full functionality and advanced audio control, download and install the Elgato Wave Link software from the official Elgato website. This software is compatible with Windows 10 and macOS.

OPERATING THE WAVE:1 MICROPHONE

1. Basic Controls

The Wave:1 features a multi-function control knob on the front:

- **Press to Mute:** A single press of the knob will mute or unmute the microphone. The LED ring around the knob indicates the microphone status.
- **Turn to Adjust:** Rotate the knob to adjust microphone input gain, headphone volume, or crossfade between microphone and PC audio, depending on the selected mode in Wave Link software.

2. Cardioid Condenser Capsule

The Wave:1 utilizes a cardioid condenser capsule, which is optimized to capture sound directly in front of the microphone while minimizing background noise from the sides and rear. This ensures clear and detailed speech capture.

3. Clipguard Technology

Elgato's proprietary Clipguard technology automatically reroutes audio through a secondary signal path that runs at a lower volume. This prevents audio clipping and distortion, even when input levels peak unexpectedly, ensuring your audio remains clean and clear.

4. Wave Link Software

The Wave Link application is a digital mixer that allows you to control the Wave:1 and up to eight other audio sources. It enables you to create two independent output mixes: one for yourself (monitor mix) and one for your audience (stream mix). This software also supports VST plugins for advanced audio processing.

UP TO NINE CHANNELS
Independent input channels let you blend audio sources in real time.

MIXING MASTERY
Two independent output mixes — one for you, one for your audience.

STREAM READY
Add Wave Link as a master audio source in OBS Studio.

WAVE LINK SOFTWARE

5. Stream Deck Compatibility

The Wave:1 integrates seamlessly with Elgato Stream Deck devices. This allows for tactile control over microphone functions, such as muting, adjusting levels, and switching between audio sources, directly from your Stream Deck.

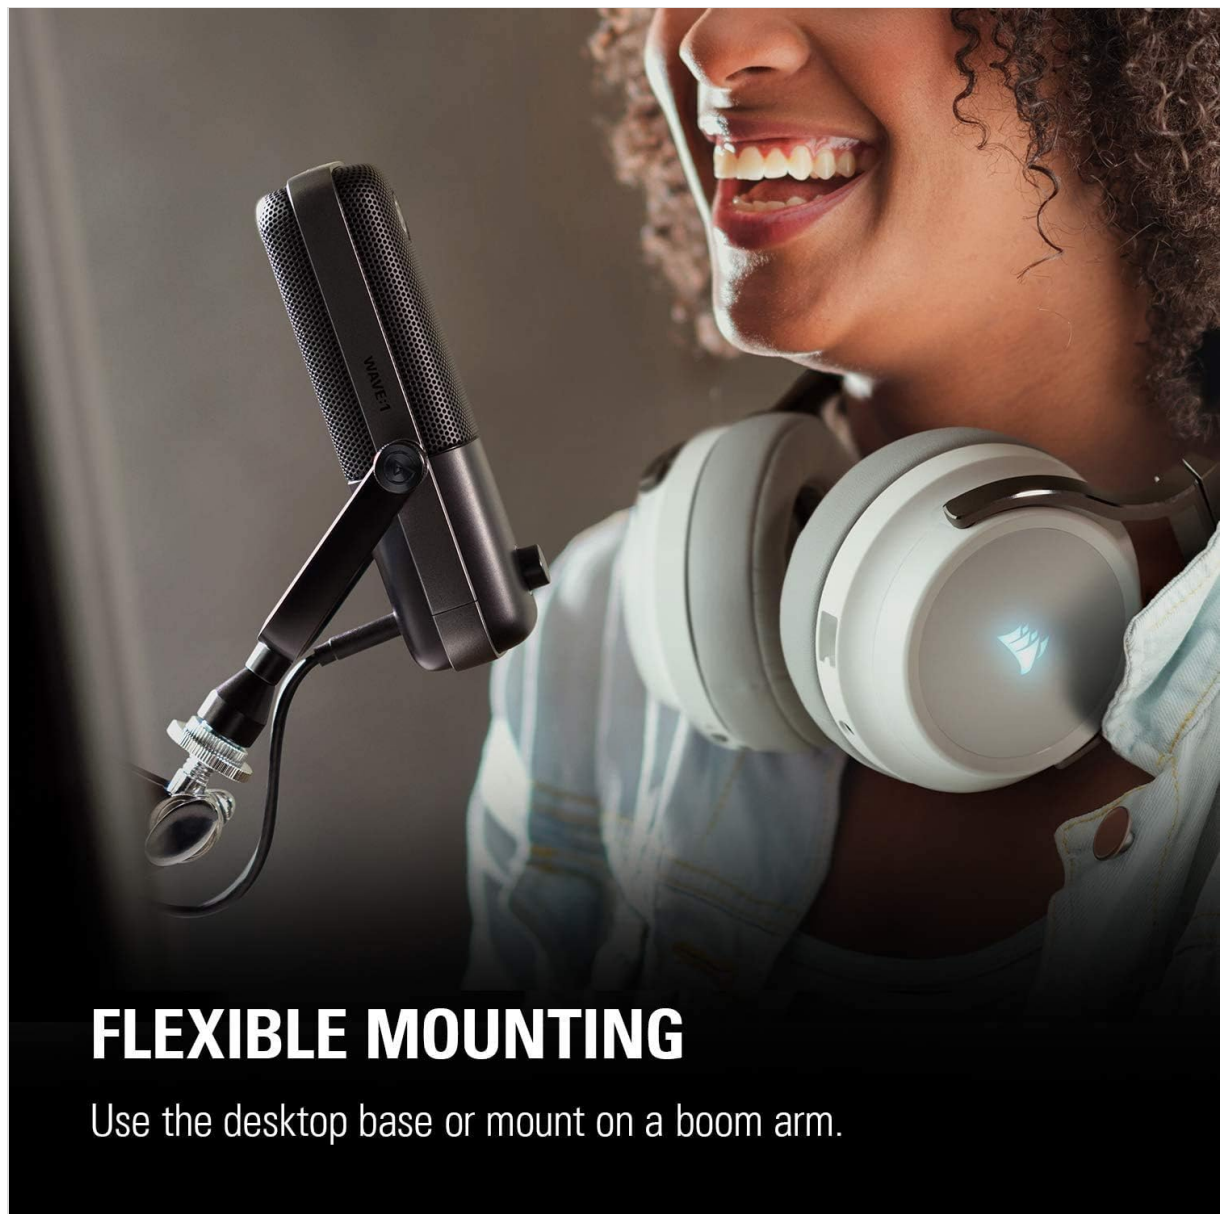

WORKS SEAMLESSLY WITH STREAM DECK

Easily set keys to mute sources, adjust levels and skip tracks — anything. Tactile and fully customizable. A hybrid mixing solution like no other.

6. Flexible Mounting

The Wave:1 can be used with its included desktop stand or mounted onto a boom arm for optimal positioning. The included boom arm adapter ensures compatibility with standard microphone mounts.

FLEXIBLE MOUNTING

MAINTENANCE

To ensure the longevity and optimal performance of your Elgato Wave:1 microphone, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the exterior of the microphone. Avoid using abrasive cleaners, solvents, or harsh chemicals. Do not spray liquids directly onto the microphone.
- **Storage:** When not in use, store the microphone in a clean, dry environment, away from extreme temperatures and humidity.
- **Handling:** Handle the microphone with care. Avoid dropping it or subjecting it to strong impacts, as this can damage internal components.

TROUBLESHOOTING

If you encounter issues with your Elgato Wave:1 microphone, refer to the following common solutions:

- **No Sound Output:**
 - Ensure the USB-C cable is securely connected to both the microphone and your computer.

- Check your computer's sound settings to confirm 'Elgato Wave:1' is selected as the input and output device.
 - Verify the microphone is not muted (check the LED ring on the control knob).
 - Confirm the input gain in Wave Link software is set appropriately.
- **Distorted Audio:**
 - While Clipguard technology minimizes distortion, ensure your input gain is not excessively high. Adjust it in Wave Link.
 - Check for any physical obstructions or damage to the microphone capsule.
- **Wave Link Software Not Recognizing Microphone:**
 - Restart your computer and the Wave Link software.
 - Try connecting the Wave:1 to a different USB port on your computer.
 - Ensure you have the latest version of Wave Link installed from the Elgato website.
- **Intermittent Connectivity:**
 - Use the original Elgato USB-C cable.
 - Avoid connecting the microphone through unpowered USB hubs. Connect directly to your computer if possible.
