Papablic 4-in-1 UV Light Sanitizer and Dryer Pro Instruction Manual

Model: Papablic46

1. INTRODUCTION

The Papablic 4-in-1 UV Light Sanitizer and Dryer Pro is designed to sanitize and dry various household items using UV-C light technology. This device offers four distinct functions: automatic sanitizing and drying, sanitizing only, drying only, and storage. It is suitable for a wide range of items, including baby feeding gear, toys, personal accessories, and more. This manual provides essential information for the safe and effective operation and maintenance of your unit.

2. IMPORTANT SAFETY INSTRUCTIONS

Please read all instructions carefully before using the appliance. Failure to follow these instructions may result in injury or damage to the product.

- **UV Exposure:** Avoid direct exposure to UV-C light. The unit is designed with a child-safety feature that automatically turns off the UV lights when the lid is opened. Do not attempt to bypass this safety mechanism.
- **Child Safety:** Keep the appliance out of reach of children. Ensure the lid is securely closed during operation.
- **Electrical Safety:** Use only with the specified power supply. Do not immerse the unit in water or other liquids. Unplug the unit when not in use or before cleaning.
- **Placement:** Place the unit on a stable, flat, heat-resistant surface. Ensure adequate ventilation around the unit.
- **Item Compatibility:** Only place items suitable for UV-C sanitization and drying inside the unit. Refer to the manufacturer's guidelines for specific items if unsure.
- **Damage:** Do not operate the unit if it has a damaged cord or plug, or if it malfunctions or has been damaged in any manner. Contact customer support for assistance.

Always Protect Your Loved Ones

3. PRODUCT COMPONENTS

The Papablic 4-in-1 UV Light Sanitizer and Dryer Pro typically includes the following components:

- Main Unit with Lid
- Stainless Steel Rack
- Accessory Basket (for smaller items)
- Power Cord
- User Manual

Two UV-C Bulbs

- UV-C wavelength 253.7nm
- Lifespan of 6000+ hours

Image 3.1: The unit is equipped with two UV-C bulbs for effective sanitization.

4. SETUP

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, wipe the interior and exterior of the unit with a damp cloth. Ensure the unit is completely dry before plugging it in.
3. **Placement:** Place the unit on a flat, stable, and dry surface away from direct sunlight and heat sources. Ensure there is sufficient space around the unit for air circulation.
4. **Power Connection:** Plug the power cord into the unit and then into a suitable electrical outlet.

5. OPERATING INSTRUCTIONS

5.1 Control Panel Overview

The unit features an intuitive touch control panel with various mode selections and a timer display.

5.2 Loading Items

Arrange items on the stainless steel rack or in the accessory basket, ensuring that UV light can reach all surfaces. Avoid overcrowding to allow for proper air circulation and UV exposure.

Sanitize Everyday Item in Minutes

Image 5.1: The unit can sanitize a variety of everyday items.

Large Capacity

10L / hold up to 12 bottles

Image 5.2: The large capacity interior can accommodate multiple items, such as baby bottles.

5.3 Operating Modes

Select the desired mode using the touch control panel:

- **Auto (Sanitize & Dry):** This mode combines both sanitization and drying cycles. Press the 'Auto' button to start. The default cycle duration is typically 30-50 minutes, depending on the model and selected setting.
- **Sanitize Only:** This mode performs UV-C sanitization without drying. Ideal for items that are already dry or sensitive to heat. Press the 'Sanitize' button. Cycle duration is usually 11-15 minutes.
- **Dry Only:** This mode provides a drying cycle without UV-C sanitization. Useful for items that need to be dried after washing. Press the 'Dry' button. Cycle duration varies.
- **Storage:** After a sanitization cycle, the unit can maintain a sanitized environment for up to 72 hours by periodically activating the UV-C lights. Press the 'Storage' button to activate this function.

To stop a cycle at any time, press the 'Power' button or open the lid (the unit will automatically pause for safety).

6. MAINTENANCE

6.1 Cleaning the Unit

1. Unplug the unit from the power outlet and allow it to cool completely before cleaning.
2. Wipe the exterior with a soft, damp cloth. Do not use abrasive cleaners or solvents.
3. For the interior, wipe with a clean, damp cloth. Ensure all surfaces are dry before next use.
4. The stainless steel rack and accessory basket can be washed with mild soap and water, then thoroughly dried.

Easy to Clean

No Descaling Required

Image 6.1: The unit is designed for easy cleaning, requiring no descaling.

6.2 UV Lamp Replacement

The UV-C lamps have an estimated lifespan of 6000+ hours. If you notice a decrease in sanitization effectiveness or if the lamps no longer illuminate, they may need replacement. Contact customer support for information on purchasing replacement lamps and instructions for safe replacement.

6.3 Filter Maintenance

The unit may contain an air filter. Check the filter periodically and clean or replace it as recommended in the full product manual to ensure optimal drying performance.

7. TROUBLESHOOTING

If you encounter issues with your Papablic 4-in-1 UV Light Sanitizer and Dryer Pro, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not turn on.	Not plugged in; power outage; faulty outlet.	Ensure power cord is securely plugged into a working outlet. Check household circuit breaker.
UV lights do not turn on.	Lid not closed properly; safety feature activated; lamps need replacement.	Ensure the lid is fully closed. If the issue persists, contact customer support for lamp replacement.
Items are not completely dry after cycle.	Overcrowding; insufficient drying time; blocked air vents.	Reduce the number of items. Select a longer drying cycle. Ensure air vents are clear and not obstructed.
Unusual odor during operation.	New unit odor; residue on items; filter needs cleaning.	Initial use may produce a slight odor, which should dissipate. Ensure items are clean before placing them in the unit. Check and clean the air filter.

If the problem persists after attempting these solutions, please contact Papablic customer support.
