

## Sealey BSC01

# Sealey BSC01 Paint Dirt Removal Needle Set Instruction Manual

## INTRODUCTION

This manual provides instructions for the proper use and maintenance of the Sealey BSC01 Paint Dirt Removal Needle Set. This product is a pack of 15 replacement needle sets, each containing 10 needles, designed specifically for use with the Sealey Model No. MK78 Paint Dirt Removal Pen. The BSC01 ensures continued effective removal of dirt and imperfections from painted surfaces when used with the compatible MK78 tool.

## SETUP AND NEEDLE REPLACEMENT

1. **Safety First:** Always wear appropriate eye protection and gloves when handling sharp tools and working with paint.
2. **Prepare the MK78 Pen:** Ensure the Sealey Model No. MK78 Paint Dirt Removal Pen is clean and free from debris before replacing needles.
3. **Remove Old Needles:** Carefully unscrew or detach the existing needle assembly from the MK78 pen. Dispose of used needles responsibly.
4. **Install New Needle Set:** Take one replacement needle set from the BSC01 pack. Align the new needle set with the pen's attachment point.
5. **Secure the Needles:** Gently screw or attach the new needle set firmly onto the MK78 pen until it is securely in place. Do not overtighten.
6. **Verify Installation:** Lightly tug on the needle set to ensure it is properly seated and will not detach during use.

## OPERATING INSTRUCTIONS

Once the new needle set is installed on your Sealey MK78 Paint Dirt Removal Pen, follow these steps for effective dirt removal:

1. **Inspect Surface:** Before use, ensure the painted surface is clean and dry. Identify the specific dirt or imperfection to be removed.

2. **Gentle Application:** Hold the MK78 pen firmly. Position the tip of the needle set directly over the dirt particle.
3. **Light Pressure:** Apply very light, controlled pressure to gently lift or dislodge the dirt. Avoid excessive force, which can damage the paint finish.
4. **Small Movements:** Use small, precise movements. It is often more effective to make several light passes than one heavy one.
5. **Check Progress:** Frequently check the surface to assess the removal progress and prevent over-working the area.
6. **Clean Residue:** After removing the dirt, gently wipe the area with a clean, soft cloth to remove any residue.

**Important:** Always test on an inconspicuous area first if you are unsure about the paint's sensitivity or the technique.

## MAINTENANCE AND STORAGE

- **Cleaning:** After each use, carefully clean the needle set and the tip of the MK78 pen to remove any paint residue or dirt. Use a soft brush or cloth.
- **Inspection:** Regularly inspect the needles for wear, bending, or damage. Replace the needle set if any signs of damage or dullness are observed to maintain optimal performance and prevent paint damage.
- **Storage:** Store the BSC01 needle sets and the MK78 pen in a clean, dry, and safe place, away from children and pets. Keep the needles in their original packaging until ready for use to protect them.

## TROUBLESHOOTING

**Issue: Needles are not effectively removing dirt.**

**Solution:** The needles may be worn or damaged. Replace the current needle set with a new one from the Sealey BSC01 pack. Ensure you are applying appropriate, light pressure.

**Issue: Paint surface appears scratched or damaged.**

**Solution:** This may indicate excessive pressure, incorrect technique, or damaged needles. Always use light pressure and ensure needles are in good condition. Practice on a test surface if unsure.

## SPECIFICATIONS

Feature	Detail
Model Number	BSC01
Product Type	Replacement Paint Dirt Removal Needle Set
Compatibility	Sealey Model No. MK78 Paint Dirt Removal Pen
Pack Quantity	15 replacement needle sets
Needles per Set	10 needles
