Sunnydaze Decor SSS-383

Sunnydaze Tour de Vase Ceramic Outdoor Water Fountain (Model SSS-383) - User Manual

Model: SSS-383 | Brand: Sunnydaze Decor

INTRODUCTION

Thank you for choosing the Sunnydaze Tour de Vase Ceramic Outdoor Water Fountain. This manual provides essential information for the safe and efficient setup, operation, and maintenance of your new fountain. Please read these instructions thoroughly before assembly and use.

Internal pump ensures a strong and steady flow of water

Create Tranquility In Any Outdoor Space

SAFETY INFORMATION

- Always disconnect the power supply before performing any maintenance or cleaning.
- Ensure the fountain is placed on a stable, level surface to prevent tipping.
- Do not operate the pump dry; always ensure it is fully submerged in water.
- Keep electrical cords away from high-traffic areas and sharp objects.
- Use a ground fault circuit interrupter (GFCI) outlet for outdoor electrical connections.
- Do not allow children or pets to play with the fountain unsupervised.
- Protect the fountain from freezing temperatures by draining and storing it indoors during winter.

PACKAGE CONTENTS

Please verify that all components are present before beginning assembly:

- Ceramic Fountain Unit (1)
- Electric Submersible Pump with Adjustable Flow (1)
- LED Light Assembly (Pre-installed or separate, refer to specific packaging)
- Power Cord for Pump and Lights (Attached)

SETUP INSTRUCTIONS

1. **Unpack and Inspect:** Carefully remove all components from the packaging. Inspect the fountain and all parts for any damage. If damage is found, do not proceed with setup and contact customer support.
2. **Choose Location:** Select a level surface for your fountain, ensuring it is within reach of a GFCI-protected electrical outlet. Consider proximity to water for easy refilling.
3. **Assemble Pump:** Place the submersible pump into the designated area within the fountain basin. Ensure the pump's tubing is securely connected to the water outlet on the fountain.
4. **LED Lights:** If the LED lights are not pre-installed, carefully place them in their designated positions, typically near the water outlets, and connect them to the appropriate connector from the pump or power supply.
5. **Fill with Water:** Fill the fountain basin with distilled water until the pump is fully submerged. Do not overfill. The fountain has a 3.5-gallon water capacity.
6. **Connect Power:** Plug the power cord into a GFCI-protected electrical outlet. The pump and lights should activate.
7. **Adjust Flow:** The pump features an adjustable flow control. Turn the dial on the pump to achieve your desired water flow rate.

OPERATING INSTRUCTIONS

- **Power On/Off:** The fountain operates by plugging it into an electrical outlet. To turn it off, simply unplug it.
- **Water Level:** Regularly check the water level. Due to evaporation, water levels will decrease over time. Refill as needed to ensure the pump remains fully submerged.
- **LED Lights:** The integrated LED lights will illuminate when the fountain is powered on, providing ambient lighting.
- **Adjusting Flow:** Use the flow control switch on the pump to increase or decrease the water circulation speed.

MAINTENANCE

- **Regular Cleaning:** Clean the fountain and pump regularly (e.g., weekly or bi-weekly) to prevent algae buildup and mineral deposits. Use a soft brush and mild soap. Rinse thoroughly.
- **Water Quality:** Use distilled water to minimize mineral buildup. Consider using a non-toxic fountain algaecide to keep water clear.
- **Pump Care:** Periodically remove the pump and clean its impeller and housing. Refer to the pump's specific instructions for detailed cleaning.
- **Winterization:** Before the first frost, drain all water from the fountain and pump. Clean and dry all components. Store the fountain and pump indoors in a dry, frost-free location to prevent damage.

Image: Features of the fountain including UV-resistant, glazed ceramic construction, and rain-resistant properties, contributing to its durability and ease of maintenance.

Problem	Possible Cause	Solution
Fountain not running / Pump not working	- No power to the outlet. - Water level is too low. - Pump is clogged. - Pump impeller is damaged.	- Check power connection and GFCI outlet. - Add water until the pump is fully submerged. - Disconnect power, remove pump, and clean thoroughly. - Contact customer support for a replacement pump if damaged.
Water flow is weak or inconsistent	- Water level is too low. - Pump is clogged. - Flow control is set too low. - Kink in tubing.	- Add water. - Clean the pump and tubing. - Adjust the flow control dial on the pump. - Straighten any kinks in the tubing.
LED lights not working	- Loose connection. - Damaged LED bulb/assembly.	- Check all light connections. - Contact customer support for replacement parts.
Water leaking from fountain	- Cracked ceramic. - Improperly seated pump or tubing.	- Inspect the fountain for cracks. If cracked, contact customer support. - Ensure all connections are tight and the pump is correctly positioned.

SPECIFICATIONS

Feature	Detail
