- **Shelf feels wobbly after installation:** Ensure all screws are tightened securely. Verify that the wall plugs are correctly seated in the wall and are appropriate for your wall type.

- **Shelf is not level:** Re-check the drilling points and bracket alignment using a spirit level during installation. Adjust as necessary.
- **Difficulty sliding shelf onto brackets:** Ensure the brackets are installed parallel and at the correct distance. Do not force the shelf; gently adjust the brackets if needed.
- **Damage to shelf surface:** For minor scratches, a wood repair marker or furniture polish matching the rustic brown finish may help.
