# Sinjimoru Phone Grip with Silicone Band Instruction Manual

Brand: Sinjimoru

Model: SGR\_MOUT\_SLCN\_BK

## 1. INTRODUCTION

The Sinjimoru Phone Grip with Silicone Band is a versatile accessory designed to enhance the usability of your smartphones, tablets, and eReaders. It functions as both a secure one-hand holder and a convenient kickstand, providing comfort and stability for various activities.

## 2. PRODUCT FEATURES

- **2-in-1 Phone Grip & Kickstand:** Combines a secure silicone-based adhesive with a built-in kickstand for hands-free use.
- **Comfortable Grip with Adhesive Backing:** Ensures a secure hold, minimizing slips during daily activities.
- **Ergonomic One-Hand Holder:** Ideal for multitasking and commuting, providing a comfortable grip for extended one-hand use.
- **Universal Device Compatibility:** Easily attaches to any case or device, compatible with iPhones, Android devices, tablets, and eReaders.
- **Simple Installation & Removal:** Features strong adhesive backing for easy attachment and reattachment without residue or loss of adhesion.

## 3. PACKAGE CONTENTS

Upon opening your Sinjimoru Phone Grip package, you should find the following items:

- Sinjimoru Phone Grip with Silicone Band
- Assistant Adhesive Film (for glass-back devices)
- Instruction Manual (this document)

## 4. SETUP AND INSTALLATION

---

Follow these steps to properly attach your Sinjimoru Phone Grip to your device:

1. **Clean the Surface:** Ensure the back surface of your phone or case is clean, dry, and free of dust or oils.
2. **Apply Assistant Adhesive Film (for Glass-Back Phones):**

If your phone has a glass back (e.g., iPhone X, iPhone 8, iPhone 7 matte black/jet black, or similar glass/special material backs), it is highly recommended to first apply the provided Assistant Adhesive Film. This film creates a suitable surface for the grip's adhesive to bond securely.

*Image: Instructions for applying the Assistant Adhesive Film.*

Carefully peel off the backing from the Assistant Adhesive Film and firmly press it onto the desired area on your phone's back. Smooth out any air bubbles.

3. **Prepare the Sinji Grip:** Peel off the red 3M protective film from the adhesive backing of the Sinji Grip.
4. **Position the Grip:** Carefully align the Sinji Grip on the back of your phone or on the applied Assistant Adhesive Film. Ensure it is centered and positioned comfortably for your hand.
5. **Apply Pressure:** Once positioned, firmly press down on the Sinji Grip for at least 30 seconds to ensure strong adhesion. For optimal bond, allow 24 hours before heavy use.

**Stable  
Grip**

**Convenient  
Stand**

**Excellent  
Durability**

**Special  
Coating**

## 5. OPERATING INSTRUCTIONS

### 5.1. Using as a One-Hand Grip

To use the Sinjimoru Phone Grip as a secure one-hand holder, simply slide your fingers through the silicone band. This allows for a comfortable and stable grip, reducing the risk of accidental drops, especially when using larger devices or multitasking.

### 5.2. Using as a Kickstand

The Sinjimoru Phone Grip can also function as a convenient kickstand for hands-free viewing. Gently pull the silicone band outwards until it forms a stable loop. You can then prop your device horizontally or vertically on a flat surface for watching videos, video calls, or browsing.

Image: Demonstrating the kickstand function for horizontal viewing.

## 6. CARE AND MAINTENANCE

- **Cleaning:** The silicone pad is dust-resistant. To clean, gently wipe with a damp cloth.
- **Avoid Overstretching:** While flexible, excessive or prolonged stretching of the silicone band, especially when using the stand function with heavy devices, may cause it to stretch out over time.
- **Adhesion:** The 3M adhesive is strong. Ensure the mounting surface is flat and clean for optimal adhesion. Reattaching to other devices is possible, but repeated removal may reduce adhesion over time.
- **Placement:** Avoid attaching the product over the fingerprint scanner part of your device, as this may interfere with its functionality.
- **Sharp Objects:** Do not scratch the product with sharp objects, as this can damage the silicone and adhesive.
- **Forceful Pulling:** The product may be damaged if pulled on too strongly.

## How to use

Image: Important notes on product usage and care.

## 7. TROUBLESHOOTING

- **Grip not sticking:** Ensure the surface is clean and flat. For glass-back phones, use the Assistant Adhesive Film. Allow 24 hours for the adhesive to fully cure after initial application.
- **Stand function is weak or unstable:** This may occur if the silicone band has been overstretched due to prolonged use or heavy device weight. Ensure the device is placed on a stable, flat surface.
- **Interference with fingerprint scanner:** If the grip is covering the fingerprint scanner, carefully re-position it to avoid obstruction.
- **Damage to grip:** Avoid using sharp objects near the grip or pulling it forcefully, as this can cause irreversible damage.

## 8. SPECIFICATIONS

Attribute	Detail
Product Dimensions	2.2 x 0.12 x 3.58 inches
Item Weight	0.247 ounces
Material	Silicone
Grip Type	Strap Grip
Color	Black
Manufacturer	Sinjimoru Co., Ltd
Model Number	SGR_MOUT_SLCN_BK
