

Unicliffe Unicliffe-2805

Unicliffe 48 Position Key Cabinet User Manual

Model: Unicliffe-2805

1. INTRODUCTION

This manual provides instructions for the installation, operation, and maintenance of your Unicliffe 48 Position Key Cabinet. This steel key organizer is designed to securely store and organize up to 48 keys, featuring a resettable 3-digit combination lock for secure access. Please read this manual thoroughly before use to ensure proper functionality and safety.

2. SAFETY INFORMATION

Important Safety Instructions:

- Install this key cabinet **INDOORS ONLY**. It is not designed for outdoor use or exposure to elements.
- Ensure proper mounting to a sturdy wall surface to prevent tipping or instability. Use appropriate hardware for your wall type.
- Keep the combination code confidential and in a secure location, separate from the cabinet.
- Do not attempt to force the lock or the cabinet door, as this may cause damage to the unit or compromise its security.

3. PRODUCT OVERVIEW

The Unicliffe 48 Position Key Cabinet is a robust solution for key organization and security. It features a durable steel construction and a user-friendly combination lock.

4. SETUP AND INSTALLATION

4.1 Unpacking

Carefully remove the key cabinet from its packaging. Verify that all components are present:

- Unicliffe 48 Position Key Cabinet

- 48 Colorful Key Tags
- 48 Number Stickers
- Mounting Screws and Wall Anchors

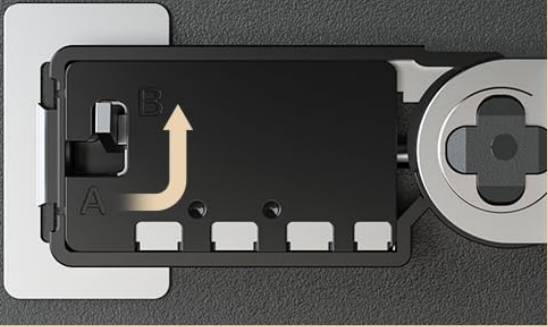

4.2 Wall Mounting

The key cabinet is designed for wall mounting. Choose a secure, indoor location. Ensure the wall material can support the weight of the cabinet and its contents.

1. Select a suitable indoor wall location.
2. Hold the cabinet against the wall at the desired height and mark the positions for the mounting holes.
3. Drill pilot holes at the marked locations. Use a drill bit appropriate for your wall anchors.
4. Insert the wall anchors into the drilled holes.
5. Align the cabinet with the anchors and secure it using the provided screws. Ensure the cabinet is firmly attached and level.

CODE RESETTING METHOD

Freely reset your
desired code within one minute

STEP01
Default code: 000
Push the inside
control lever from A to B

STEP02
Scroll the digits outside
to set your code

STEP03
Pull the control
lever back from B to A

Figure 4: Illustration emphasizing that the key cabinet should be installed indoors only, ideal for various settings.

4.3 Setting the Combination Code

The initial factory code for the combination lock is **"000"**. Follow these steps to set your personal 3-digit code:

1. Open the cabinet using the default code "000".
2. Locate the control lever on the inside of the lock mechanism.
3. Push the control lever from position **A** to position **B**.

4. While the lever is in position B, rotate the dials on the outside of the lock to your desired 3-digit combination.
5. Once your new code is set, pull the control lever back from position **B** to position **A**.
6. Test your new code by scrambling the dials and then entering your new combination to open the cabinet.

Important: Remember your new code. There is no master key or override if the code is forgotten.

48-KEY STEEL KEY CABINET

5. OPERATING INSTRUCTIONS

5.1 Opening and Closing the Cabinet

1. To open: Rotate the dials to your set 3-digit combination. Turn the knob to the right to unlock and open the door.
2. To close: Close the door firmly. Scramble the dials to secure the lock.

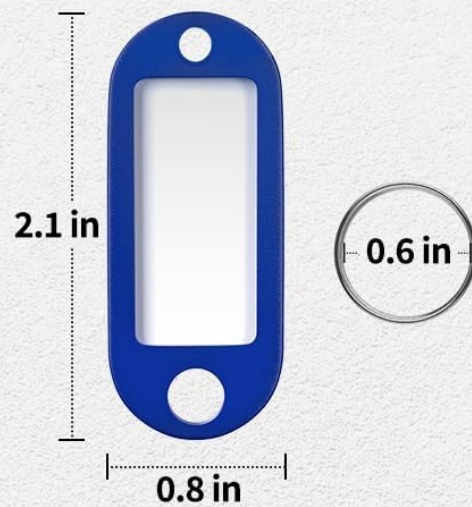

5.2 Organizing Keys with Tags and Stickers

The cabinet comes with 48 colorful key tags and number stickers to help you organize your keys efficiently.

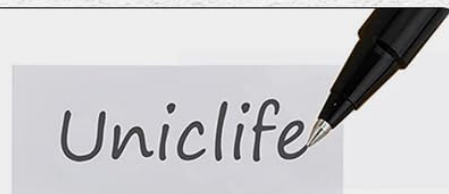

INSTALL IT INDOORS ONLY

Ideal for family members,
employees or real estate agents

=

01 | Remove the key ring to
slide the label out

02 | Write information on
the paper label

03 | Put the label and the key
ring back

Figure 7: The key cabinet features two layers to accommodate up to 48 keys, ensuring neat and numerically arranged storage.

48 COLORFUL KEY TAGS

Easily classify and
keep track of keys by labeling

Figure 8: A selection of 48 colorful key tags, designed for easy classification and tracking of keys through labeling.

1. **Using Key Tags:** Each flexible key tag has a transparent window and a removable blank paper insert. Slide out the paper to write labels (e.g., room number, key purpose). Slide the paper back in and attach your key to the tag's key ring.
2. **Using Number Stickers:** Apply the provided number stickers (1-48) next to each hook inside the cabinet. This allows for numerical organization and quick identification of keys.
3. **Placing Keys:** Hang the key tags onto the designated hooks inside the cabinet. The two-layer design helps maximize

storage and organization.

6. MAINTENANCE

To ensure the longevity and proper functioning of your Unicliffe Key Cabinet, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the exterior and interior surfaces with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish.
- **Lock Mechanism:** The combination lock is designed to be maintenance-free. Do not lubricate the dials or internal mechanism.
- **Inspection:** Periodically check the mounting screws to ensure they remain tight and secure.
- **Environment:** Store the cabinet in a dry, indoor environment to prevent rust or damage.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Cabinet will not open with the set code.	Incorrect code entered, or dials not aligned precisely.	Double-check your code. Ensure each number is perfectly centered in the viewing window. Try rotating the dials slightly past the number and then back to it.
Code resetting lever does not move.	The lock may not be in the open position, or the dials are not set to the current code.	Ensure the cabinet is open and the dials are set to the current working code (default "000" or your last set code) before attempting to move the lever.
Cabinet door feels loose after mounting.	Mounting screws are not tight enough or wall anchors are insufficient.	Tighten all mounting screws. If the issue persists, consider using stronger wall anchors or relocating the cabinet to a more secure wall stud.

If you encounter issues not listed here, please refer to the support section for assistance.

8. SPECIFICATIONS

- Brand:** Unicliffe
- Model:** Unicliffe-2805
- Capacity:** 48 Key Positions
- Color:** Black
- Material:** Alloy Steel
- Product Dimensions (D x W x H):** 3" x 8" x 9.8" (7.6 cm x 20 cm x 25 cm)
