- **Watch not turning on:** Ensure the battery is charged. Connect the watch to the USB charger for at least 30 minutes, then attempt to power on.
- **Screen unresponsive:** Try restarting the watch by holding down the power button. If unresponsive, allow the battery to fully drain and then recharge.
- **Charging issues:** Verify the USB cable is securely connected to both the watch and the power source. Try a different USB port or power adapter.
- **Features not working:** Ensure the watch's software is up to date (if applicable, though this model typically does not have user-updatable firmware). A factory reset (found in Settings) can resolve software glitches, but will erase all user data.
