- 1x iSetchi Magnetic Car Phone Holder
- 2x Square Magnetic Plates & Protective Stickers
- 1x User Manual
- 2x Round Magnetic Plates & Protective Stickers

## Features

The iSetchi Magnetic Car Phone Holder offers several key features for an enhanced user experience:

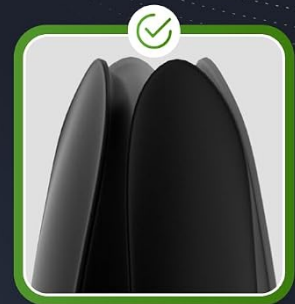

- **Universal Compatibility:** Suitable for smartphones with screen sizes up to 10 inches.
- **Strong Magnetic Hold:** Equipped with four powerful magnets, capable of holding devices up to 760 grams securely.
- **One-Hand Operation:** Easily attach and detach your phone with a single hand.
- **Rotatable Design:** Allows for 360-degree rotation to achieve optimal viewing angles.

- **Compact and Durable:** Features a sleek, compact design with a premium metal edge and robust construction.
- **Air Vent Mounting:** Designed for secure attachment to car air vents, keeping your dashboard clear.
- **Anti-Slip and Anti-Shock:** Incorporates anti-slip rubber and a rubber anti-shock layer for enhanced stability and protection.
- **Dual Magnetic Plate Set:** Includes an extra set of magnetic plates, allowing use with multiple phones or for future device upgrades.

## Compatibility

The iSetchi Magnetic Car Phone Holder is designed for broad compatibility with smartphones and specific car air vent types.

- **Compatible Devices:** All smartphones.
- **Compatible Air Vents:** The holder is designed to fit air vents with **straight slats**. The feet of the holder are 2 cm long, so ensure your vent has sufficient depth.

## Setup and Installation

Follow these steps to properly install your iSetchi Magnetic Car Phone Holder and prepare your smartphone for use.

### 1. Mounting the Holder

1. Identify a suitable air vent in your car with straight slats.
2. Gently push the rubber feet of the iSetchi holder into the air vent slats until it is securely seated. Ensure the holder is stable and does not wobble.

### 2. Attaching the Magnetic Plate to Your Phone

The package includes both square and round magnetic plates, along with protective stickers. Choose the method that best suits your phone and usage.

Image: Instructions for applying the magnetic plate to a phone, with or without a protective case.

- **For Phones with a Case:**

- a. Clean the back of your phone or the inside of your phone case.
- b. Peel off the backing from a protective sticker and apply it to the back of your phone, or the inside of your case, where you intend to place the magnetic plate. This prevents direct contact between the magnet and your phone's surface.
- c. Peel off the backing from a **square magnetic plate** and stick it firmly onto the protective sticker.
- d. Place your phone back into its case. The magnetic plate will now be hidden inside the case.

- **For Phones without a Case:**

- a. Clean the back of your phone.
- b. Peel off the backing from a protective sticker and apply it to the back of your phone where you intend to place the magnetic plate.
- c. Peel off the backing from a **round magnetic plate** and stick it firmly onto the protective sticker.

- **Note on Wireless Charging:** If you use wireless charging, apply the **small round magnetic plate** slightly above

the center of your phone's back. This placement helps prevent interference with the wireless charging signal.

## Operating Instructions

Once the holder is installed and the magnetic plate is attached to your phone, using the iSetchi holder is straightforward:

1. Bring your smartphone close to the magnetic surface of the holder. The strong magnets will automatically attract and secure your phone in place.
2. Adjust the viewing angle by rotating your phone on the magnetic surface. The holder allows for 360-degree rotation.
3. To remove your phone, simply pull it away from the magnetic surface.

## VEILIG DE WEG OP

## Maintenance

To ensure the longevity and optimal performance of your iSetchi Magnetic Car Phone Holder, follow these simple

maintenance guidelines:

- **Cleaning:** Wipe the holder with a soft, dry cloth to remove dust or smudges. Do not use abrasive cleaners or solvents, as these can damage the finish.
- **Magnetic Plates:** Ensure the magnetic plates on your phone or case remain clean and free of debris to maintain a strong connection.
- **Storage:** When not in use for extended periods, store the holder in a cool, dry place away from direct sunlight.

## Troubleshooting

If you encounter any issues with your iSetchi Magnetic Car Phone Holder, refer to the following common problems and solutions:

- **Problem:** The phone does not stay securely on the holder.  
**Solution:**
  - Ensure the magnetic plate is correctly positioned on your phone or inside its case.
  - Check if your phone case is too thick, which might weaken the magnetic connection. Consider using a thinner case or placing the magnetic plate on the outside of the case (with a protective sticker).
  - Verify that the magnetic plate and the holder's surface are clean and free of obstructions.
- **Problem:** The holder does not fit securely into the car's air vent.  
**Solution:**
  - Confirm that your car's air vent has straight slats, as the holder is designed for this type.
  - Ensure the vent slats are deep enough (at least 2 cm) for the holder's feet to grip properly.
- **Problem:** Wireless charging is not working after attaching the magnetic plate.  
**Solution:**
  - If you are using wireless charging, ensure you have used the **small round magnetic plate** and placed it slightly above the center of your phone's back to avoid interfering with the charging coil.
  - Remove the magnetic plate and test wireless charging to confirm the plate is the cause.
