1. PRODUCT OVERVIEW

The KANGAROO Car Wax Polish Mirror Shine is a high-performance carnauba wax polish designed to enhance the exterior finish of your vehicle. This product helps to restore and protect your car's paint and clear-coat finish, providing a deep shine and removing minor imperfections.

Key features include:

- Formulated to protect car paint and clear-coat finishes.
- Helps recondition paint from normal wear and tear.
- Effective in removing compounding scratches, towel marks, swirls, hazing, and holograms.
- Suitable for buffing fresh paint after color sanding or improving factory-applied paint finishes.

2. SAFETY INFORMATION

Please read and understand all safety precautions before using this product. Failure to follow these instructions may result in injury or damage.

- **Keep out of reach of children and pets.**
- Use in a **well-ventilated area** to avoid inhalation of fumes.
- Avoid contact with eyes and skin. In case of contact, rinse thoroughly with water. If irritation persists, seek medical attention.
- Do not ingest. If swallowed, do not induce vomiting. Seek immediate medical attention.
- Store in a cool, dry place away from direct sunlight and extreme temperatures.
- Do not apply to hot surfaces. Ensure the vehicle's surface is cool to the touch.
- Dispose of product and packaging according to local regulations.

3. PACKAGE CONTENTS

The KANGAROO Car Wax Polish package includes the following items:

- 1 x 1 Litre bottle of KANGAROO Car Wax Polish Mirror Shine (Rich Carnauba)
- 1 x Foam Applicator

2 Foam Applicator

Figure 2: Included foam applicator for polish application.

4. PREPARATION FOR APPLICATION

Proper preparation ensures optimal results and a streak-free finish.

1. **Wash Vehicle:** Thoroughly wash your vehicle to remove all dirt, grime, and contaminants. Use a high-quality car wash soap and rinse completely.
2. **Dry Vehicle:** Dry the vehicle completely using a clean microfiber towel. Ensure no water spots or residue remain.
3. **Cool Surface:** Ensure the vehicle's surface is cool to the touch and out of direct sunlight. Applying polish to a hot surface can lead to rapid drying and streaking.
4. **Shake Bottle:** Shake the KANGAROO Car Wax Polish bottle well before use to ensure the ingredients are properly mixed.

5. OPERATING INSTRUCTIONS (APPLICATION)

Follow these steps for effective application of the car wax polish:

1. **Apply to Applicator:** Dispense a small amount of KANGAROO Car Wax Polish onto the foam applicator. A little goes a long way.
2. **Apply to Surface:** Spread the polish evenly over a small section of the vehicle's surface (e.g., a single panel) using circular motions. Apply light to moderate pressure.
3. **Allow to Dry:** Allow the polish to dry to a light haze. This typically takes a few minutes, depending on temperature and humidity. Do not let it dry completely or bake in the sun.
4. **Buff Off:** Using a clean, soft microfiber cloth, gently buff off the dried haze. Turn the cloth frequently to a clean side to avoid re-depositing polish. Continue buffing until a mirror-like shine is achieved.
5. **Repeat:** Move to the next section of the vehicle and repeat steps 1-4 until the entire vehicle is polished.

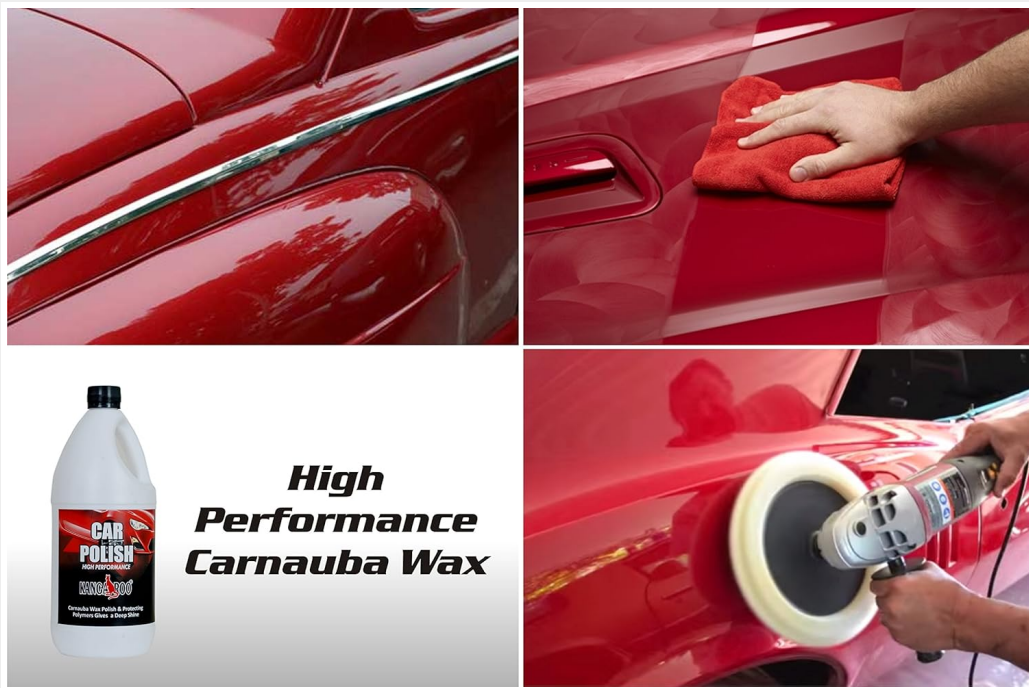

Figure 3: Illustration of car wax application and buffing process.

6. MAINTENANCE AND STORAGE

- **Applicator Care:** After each use, wash the foam applicator thoroughly with mild soap and water. Rinse well and allow it to air dry completely before storing.
- **Microfiber Cloths:** Wash used microfiber cloths separately from other laundry to prevent lint transfer. Do not use fabric softener, as it can reduce absorbency.
- **Product Storage:** Store the KANGAROO Car Wax Polish bottle upright in a cool, dry place, away from direct sunlight and freezing temperatures. Ensure the cap is tightly sealed.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Streaks or Haze Remain	<ul style="list-style-type: none"> ◦ Applied too much polish. ◦ Polish dried too long. ◦ Surface was too hot. ◦ Dirty or saturated microfiber cloth. 	<ul style="list-style-type: none"> ◦ Use less product. ◦ Work in smaller sections. ◦ Ensure surface is cool. ◦ Use a clean, dry microfiber cloth.
Uneven Shine	<ul style="list-style-type: none"> ◦ Inconsistent application. ◦ Not buffed thoroughly. 	<ul style="list-style-type: none"> ◦ Ensure even spread of polish. ◦ Buff thoroughly with a clean cloth.
Polish Difficult to Remove	<ul style="list-style-type: none"> ◦ Left on surface for too long. ◦ Applied in direct sunlight or on a hot surface. 	<ul style="list-style-type: none"> ◦ Work in smaller sections and remove promptly. ◦ Apply in shade on a cool surface. ◦ Re-apply a small amount of polish to the stubborn area to reactivate it, then buff immediately.

8. PRODUCT SPECIFICATIONS
