SETUP GUIDE

Charging Your Headphones

Before initial use, ensure your PowerLocus P6 headphones are fully charged to maximize battery life and performance.

1. Connect the small end of the provided USB charging cable to the charging port on the headphones.
2. Connect the standard USB end of the cable to a compatible USB power source (e.g., computer USB port, USB wall adapter).
3. The LED indicator light on the headphones will illuminate to show charging status. Refer to the 'LED Indicator Status' section for specific light patterns (if available in a full manual, otherwise assume standard red for charging, blue for charged).
4. A full charge typically takes approximately 2.5 hours.

Bluetooth Pairing

Follow these steps to connect your PowerLocus P6 headphones to your device via Bluetooth:

1. Ensure the headphones are turned off.
2. Press and hold the Power button on the headphones until the LED indicator begins to flash blue and red alternately. This indicates the headphones are in pairing mode.
3. On your smartphone, tablet, or computer, navigate to the Bluetooth settings and enable Bluetooth.
4. Search for available devices. You should see "PowerLocus P6" appear in the list.
5. Select "PowerLocus P6" to initiate the connection.
6. Once successfully paired, the LED indicator on the headphones will turn solid blue or flash blue slowly, and you will hear an audible confirmation.

MAINTENANCE AND CARE

Proper care will extend the life and performance of your PowerLocus P6 headphones:

- **Cleaning:** Regularly wipe the headphones with a soft, dry, lint-free cloth. Do not use abrasive cleaners, alcohol, or chemical solvents.
- **Storage:** When not in use, store the headphones in the provided premium carry case to protect them from dust, scratches, and accidental damage.
- **Temperature & Humidity:** Avoid exposing the headphones to extreme temperatures (hot or cold), high humidity, or direct sunlight.
- **Liquids:** Keep the headphones away from water and other liquids. They are not water-resistant.
- **Handling:** Do not drop, crush, or bend the headphones excessively. Avoid pulling on the cables forcefully.
- **Service:** Do not attempt to disassemble, modify, or repair the headphones yourself. This will void the warranty and may cause damage. Contact customer support for assistance.

TROUBLESHOOTING

If you encounter any issues with your PowerLocus P6 headphones, please refer to the following common problems and solutions:

Headphones won't turn on.

Ensure the headphones are fully charged. Connect them to a power source using the USB charging cable and allow them to charge for at least 15-30 minutes before attempting to turn them on again.

Cannot pair with a device.

Make sure the headphones are in pairing mode (LED flashing blue and red). Ensure Bluetooth is enabled on your device and it's within the effective range (up to 12m/39ft). Try turning off Bluetooth on your device, then turning it back on. If previously paired, try 'forgetting' or 'unpairing' the headphones from your device's Bluetooth list and then re-pairing.

No sound or low volume.

Check the volume levels on both the headphones and your connected device. Ensure the headphones are properly paired and connected. If using wired mode, ensure the 3.5mm audio cable is securely connected to both the headphones and the audio source.

Sound quality is poor or distorted.

Ensure there are no physical obstructions between the headphones and the Bluetooth device. Move closer to the device to improve signal strength. If using wired mode, ensure the cable is fully inserted and not damaged. Try playing audio from a different source to rule out source issues.

Calls are unclear or microphone is not working.

Ensure the built-in microphone is not obstructed. Check your device's audio settings to confirm that the headphone microphone is selected as the input device for calls. Ensure you are within Bluetooth range.
