FilterTech AP-1004AH / AP-1005AH

FilterTech Replacement Filter Set User Manual

For Coway AP-1004AH / AP-1005AH Air Purifiers

1. INTRODUCTION

This manual provides instructions for the proper installation and maintenance of your FilterTech compatible replacement filter set for Coway AP-1004AH and AP-1005AH air purifiers. Regular filter replacement is essential to maintain optimal air purification performance and air quality in your environment.

2. PACKAGE CONTENTS

Your FilterTech replacement filter set includes the following components, designed for a 1-year use period:

- **HEPA Filter:** 1 piece
- **Carbon Filter:** 1 piece
- **Medium Filter:** 2 pieces
- **Nonwoven Filter:** 2 pieces

Total: 6 filter pieces.

This image displays the complete FilterTech replacement filter set. It includes a rectangular HEPA filter with a pleated white surface, a black honeycomb-patterned carbon filter, and several white, layered nonwoven/medium filters, all designed for compatible Coway air purifier models.

3. COMPATIBLE AIR PURIFIER MODELS

This FilterTech replacement filter set is compatible with the following Coway air purifier models:

- Coway AP-1004AH
- Coway AP-1005AH

Please verify your air purifier model before installation to ensure compatibility.

4. SETUP AND INSTALLATION

Follow these general steps to replace the filters in your compatible Coway air purifier. Always refer to your air purifier's

original user manual for specific instructions on opening the unit and filter placement.

1. **Power Off:** Before beginning, ensure your air purifier is turned off and unplugged from the power outlet.
2. **Access Filter Compartment:** Open the front cover or access panel of your air purifier according to its specific design.
3. **Remove Old Filters:** Carefully remove the used filters. Note their orientation and order for correct installation of the new filters. Dispose of old filters responsibly.
4. **Install New Filters:** Insert the new FilterTech filters in the correct order and orientation. Typically, the nonwoven/pre-filters are installed first, followed by the carbon filter, and then the HEPA filter. Ensure any 'FRONT' markings on the filters face the correct direction as indicated by your air purifier.
5. **Close Compartment:** Securely close the filter compartment or front cover.
6. **Restore Power:** Plug the air purifier back into the power outlet and turn it on.
7. **Reset Filter Indicator (if applicable):** If your air purifier has a filter replacement indicator, follow its manual to reset it.

5. OPERATING INSTRUCTIONS

Once the FilterTech replacement filters are correctly installed, your air purifier will operate as usual. The filters work continuously to capture airborne particles and odors, improving your indoor air quality.

The recommended use period for this filter set is **1 year**. These filters are non-reusable and should be replaced after this period for optimal performance.

6. MAINTENANCE

Consistent maintenance, primarily timely filter replacement, is crucial for the efficiency and longevity of your air purifier.

- **Replacement Schedule:** Replace the entire filter set every 12 months (1 year) under normal operating conditions. More frequent replacement may be necessary in environments with higher pollution levels or continuous use.
- **Filter Disposal:** Used filters should be disposed of with regular household waste. They are not recyclable.
- **Cleaning:** The HEPA and Carbon filters are not washable and should not be cleaned. Attempting to wash them will damage the filter media and reduce their effectiveness.

7. TROUBLESHOOTING

Issue: Unpleasant odor from new filters after installation.

Possible Cause: New carbon filters may release a slight odor (off-gassing) initially, or there might be residual manufacturing odors.

Solution: Remove the new filters and allow them to air out in a well-ventilated area for several hours before re-installing. Ensure the filters are installed correctly. If the odor persists after a few days of use, contact customer support.

Issue: Reduced air purification performance or increased noise.

Possible Cause: Filters are old, clogged, or incorrectly installed.

Solution: Check that all filters are installed correctly and securely. If the filters have been in use for close to or over 1 year, they are likely saturated and require replacement. Ensure the air purifier's intake and output vents are not obstructed.

8. SPECIFICATIONS

Brand	FilterTech
Compatible Models	Coway AP-1004AH, AP-1005AH
Filter Types Included	HEPA, Carbon, Medium, Nonwoven
Recommended Use Period	1 Year (non-reusable)
Number of Items	6 (1 HEPA, 1 Carbon, 2 Medium, 2 Nonwoven)
Item Weight	2.16 pounds (0.98 kg)
Package Dimensions	16 x 15.4 x 2 inches
MERV Rating	13

9. WARRANTY AND SUPPORT

For any questions regarding the FilterTech replacement filter set, or for support with installation and troubleshooting beyond the scope of this manual, please contact the manufacturer directly. Specific warranty information may vary; please refer to your purchase documentation or the manufacturer's official website for details.
