VINGLI VINGLI 1088

VINGLI Leaf Canister (Model VINGLI 1088) Instruction Manual

Brand: VINGLI

INTRODUCTION

This manual provides instructions for the proper setup, operation, and maintenance of your VINGLI Leaf Canister, Model VINGLI 1088. This device is designed to capture leaves, twigs, and other large debris before they reach your pool's filtration system, protecting your pump and improving cleaning efficiency.

PRODUCT COMPONENTS

The VINGLI Leaf Canister consists of several key components:

- Clear Canister Body: Allows visual inspection of collected debris.
- Removable Mesh Basket: Collects leaves and debris.
- Lid with Handle: Secures the basket and provides a connection point for the pool hose.
- Hose Connectors: For attaching to your pool vacuum hose.

SETUP INSTRUCTIONS

Follow these steps to properly set up your VINGLI Leaf Canister:

1. **Connect to Pool Vacuum Hose:** Attach one end of your pool vacuum hose to the inlet of the leaf canister. Ensure a secure and snug fit to prevent air leaks.
2. **Connect to Pool Cleaner:** Attach the other end of the leaf canister to your automatic pool cleaner or sweeper.
3. **Submerge and Prime:** Submerge the entire assembly in the pool water to remove any trapped air. This ensures proper suction.
4. **Start Pool Vacuum:** Once submerged and primed, activate your pool vacuum cleaner. The canister should now begin collecting debris.

OPERATING INSTRUCTIONS

The VINGLI Leaf Canister operates in conjunction with your automatic pool cleaner. Its clear body allows for easy visual monitoring of the debris level.

Emptying the Debris Basket:

When the clear canister body indicates that the mesh basket is full, it needs to be emptied to maintain optimal performance.

1. **Turn Off Pool Pump:** Before handling the canister, ensure your pool pump is turned off to stop water flow and suction.
2. **Remove Canister from Water:** Carefully lift the canister out of the pool.
3. **Open the Lid:** To open the lid, **hold down the orange release button** located on the handle and simultaneously **turn the lid counterclockwise**.
4. **Remove and Empty Basket:** Lift out the mesh basket and discard the collected debris.
5. **Clean Basket:** Rinse the mesh basket thoroughly with a garden hose to remove any remaining small particles.

6. **Reinsert Basket:** Place the clean mesh basket back into the clear canister body, ensuring it is seated correctly.
7. **Close the Lid:** Align the lid with the canister body, press down, and **turn it clockwise** until it clicks securely into place. Ensure the lid is tightly sealed to prevent air leaks.
8. **Resume Operation:** Re-submerge the canister and restart your pool pump.

MAINTENANCE

Regular maintenance ensures the longevity and efficient operation of your VINGLI Leaf Canister.

- **Basket Cleaning:** Always rinse the mesh basket after emptying to prevent debris buildup and maintain optimal water flow.
- **Lid Seal Lubrication:** Periodically apply a silicone-based lubricant to the O-ring seal on the lid. This helps maintain a tight seal and makes opening and closing the lid easier.
- **Hose Connection Check:** Regularly inspect the hose connections for any signs of wear, cracks, or loose fittings that could lead to air leaks.

- **General Cleaning:** Clean the clear canister body with mild soap and water as needed to maintain visibility. Avoid abrasive cleaners.

TROUBLESHOOTING

If you encounter issues with your VINGLI Leaf Canister, refer to the following troubleshooting guide:

Problem	Possible Cause	Solution
Difficulty Opening the Lid	Lid is overtightened, O-ring is dry, or debris is lodged in the seal.	Ensure you are holding down the orange release button while turning the lid counterclockwise. Apply silicone lubricant to the O-ring. Clean any debris from the lid and canister threads.
Reduced Suction or Air Leaks	Lid not sealed properly, loose hose connections, or damaged O-ring.	Ensure the lid is securely closed and clicked into place. Check all hose connections for tightness. Inspect the O-ring for cracks or damage and replace if necessary.
Canister Not Collecting Debris Effectively	Mesh basket is full, or there is a loss of suction.	Empty and clean the mesh basket. Refer to "Reduced Suction or Air Leaks" troubleshooting steps.

SPECIFICATIONS

Feature	Detail
Brand	VINGLI
Model Name	VINGLI 1088
Material	Plastic
Color	Blue & Grey
Item Weight	1.34 Kilograms
Capacity (Length)	17.71 Inches
Installation Type	Manual
UPC	810158422148
