Pyrex 7210

Pyrex Simply Store 7210 3-Cup Rectangle Clear Glass Container User Manual

INTRODUCTION

This manual provides essential information for the safe and effective use of your Pyrex Simply Store 7210 3-Cup Rectangle Clear Glass Containers. These durable, non-porous tempered glass containers are designed for versatile food storage and preparation, suitable for cooking, baking, storing, and reheating food. This product includes four (4) 3-cup rectangular glass containers.

SETUP

1. **Unpacking:** Carefully remove all containers from their packaging. Inspect each container for any signs of damage.
2. **Initial Cleaning:** Before first use, wash all glass containers thoroughly with warm, soapy water. Rinse completely and dry. The containers are also dishwasher safe.
3. **Lids:** Please note that lids for model 7210-PC are sold separately and are not included with this glass container set.

OPERATING INSTRUCTIONS

General Use

- **Food Storage:** These containers are ideal for storing dairy products, dry goods, fruit, leftovers, meals, milk, and vegetables in the refrigerator or freezer.
- **Reheating:** Food can be reheated directly in the glass containers in a microwave or conventional oven. Always remove any plastic lids before placing in a conventional oven or microwave.

Oven Use

- Pyrex glass containers are safe for use in preheated conventional ovens.

- Do not place hot glass directly on a cold or wet surface, as this may cause breakage.
- Avoid extreme temperature changes. For example, do not add cold liquids to a hot container or place a hot container directly into a cold refrigerator or freezer.

Microwave Use

- The glass containers are microwave safe.
- Ensure any lids are removed or vented if using in the microwave.

Refrigerator and Freezer Use

- The containers are safe for use in the refrigerator and freezer.
- When freezing liquids, leave some space at the top to allow for expansion.

MAINTENANCE AND CARE

- **Dishwasher Safe:** All Pyrex Simply Store glass containers are dishwasher safe for easy cleaning. Place them on the top rack for best results.
- **Hand Washing:** For hand washing, use a non-abrasive sponge or cloth with warm, soapy water. Avoid using harsh scouring pads or abrasive cleaners that could scratch the glass.
- **Stubborn Stains:** For stubborn food residue, soak the container in warm, soapy water before cleaning. A paste of baking soda and water can also be used for gentle scrubbing.
- **Storage:** Store containers carefully to prevent chipping or breakage. Avoid stacking without protection if not designed for nesting.

TROUBLESHOOTING

- **Glass Breakage:** Pyrex glass is durable, but it can break if subjected to sudden, severe temperature changes or impact. Always allow hot containers to cool before washing or placing in a cold environment. Avoid dropping or hitting the containers.
- **Food Sticking:** If food sticks to the container, soak it in warm, soapy water for a period before attempting to clean. For baked-on food, a plastic scraper can be used gently.
- **Cloudiness:** Over time, some hard water deposits may cause cloudiness. This can often be removed by soaking the container in white vinegar for a few hours, then washing as usual.

SPECIFICATIONS

Feature	Specification
