4. SETUP

Follow these steps to set up your HP Z440 Workstation:

1. **Unpack the Workstation:** Carefully remove the workstation and all accessories from the packaging.
2. **Connect Peripherals:**
 - Connect the wired keyboard and mouse to the available USB ports on the front or rear panel.
 - Connect your monitor(s) to the appropriate video output ports (HDMI, VGA) on the rear panel.
 - If using a wired network, connect an Ethernet cable to the RJ-45 port.
3. **Connect Power:** Plug the power cord into the AC power-supply port on the rear of the workstation, then plug the other end into a grounded electrical outlet.
4. **Power On:** Press the power button on the front panel of the workstation. The system will begin to boot up.
5. **Initial Setup (if applicable):** If no operating system is pre-installed, you will need to install one. Follow the on-screen instructions for your chosen operating system.

5. OPERATING INSTRUCTIONS

5.1. Power On/Off

- **To Power On:** Press the power button on the front panel.
- **To Power Off:** For normal shutdown, use the operating system's shutdown procedure. For a forced shutdown, press and hold the power button for 5-10 seconds.

5.2. Connecting to a Network

- **Wired Connection:** Connect an Ethernet cable to the RJ-45 port on the rear panel.
- **Wireless Connection (Wi-Fi):** If your workstation has Wi-Fi capability, access your operating system's network settings to connect to an available wireless network.

5.3. Using USB Devices

Connect USB devices such as external hard drives, flash drives, printers, or scanners to any available USB port. The operating system will typically detect and install necessary drivers automatically.

5.4. Display Output

The workstation supports multiple displays via its HDMI and VGA ports. Configure display settings through your operating system to extend or duplicate your desktop.

6. MAINTENANCE

Regular maintenance helps ensure optimal performance and extends the lifespan of your workstation.

- **Cleaning:** Regularly clean the exterior of the workstation with a soft, dry cloth. Use compressed air to clear dust from vents and fan openings to prevent overheating. Ensure the workstation is powered off and unplugged before cleaning.
- **Software Updates:** Keep your operating system, drivers, and applications updated to the latest versions for security and performance improvements.
- **Data Backup:** Periodically back up important data to an external drive or cloud storage to prevent data loss.
- **Internal Inspection:** For advanced users, occasional internal inspection for dust buildup on components like CPU heatsinks and GPU fans is recommended. This should only be performed by qualified personnel.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your HP Z440 Workstation.

Problem	Possible Cause	Solution
Workstation does not power on.	No power, faulty power supply, loose connections.	Check power cord connection to both the workstation and the outlet. Ensure the outlet is functional. Try a different power cord.
No display on monitor.	Monitor not connected, incorrect input source, faulty cable, graphics card issue.	Ensure monitor is powered on and connected to the correct video port. Select the correct input source on the monitor. Try a different video cable or monitor.
System is slow or unresponsive.	Too many applications open, low RAM, hard drive issues, malware.	Close unnecessary applications. Check Task Manager/Activity Monitor for resource usage. Run a disk check and antivirus scan. Consider upgrading RAM or storage if consistently slow.
Peripheral (keyboard/mouse) not working.	Loose connection, faulty device, driver issue.	Reconnect the device to a different USB port. Test with another known-good device. Check device manager for driver status.
