MAINTENANCE

Proper care will ensure the longevity and optimal performance of your DVD discs:

- **Handling Discs:** Always hold discs by their edges or by placing a finger through the center hole. Avoid touching the shiny playback surface.
- **Cleaning Discs:** If a disc has smudges or dust, gently wipe the playback surface with a soft, lint-free cloth (e.g., microfiber cloth) in a straight line from the center to the outer edge. Do not wipe in a circular motion. For stubborn marks, a small amount of disc cleaning solution or water can be applied to the cloth, not directly to the disc.
- **Storage:** Store discs in their original case, away from direct sunlight, extreme temperatures, and high humidity. Keep the case closed to prevent dust accumulation.
- **Avoid Scratches:** Be careful when removing and returning discs to their slots to prevent scratching.

TROUBLESHOOTING

If you encounter any issues during playback, refer to the following common problems and solutions:

Problem	Solution
Disc does not play or load.	• Ensure the disc is inserted correctly (label side up). • Clean the disc surface for smudges or dust. • Try playing the disc in another DVD/Blu-ray player to rule out player issues. • Check if the disc is severely scratched or damaged.
Video or audio skipping/freezing.	• Clean the disc thoroughly. • Check for deep scratches on the disc surface. • Ensure your player's firmware is up to date.
No audio or video output.	• Verify that all cables (HDMI, audio, video) are securely connected between the player and the TV/receiver. • Ensure your TV is set to the correct input source. • Check the volume level on your TV and audio receiver.
Disc tray won't open/close.	• Check for any obstructions in the disc tray. • Power cycle your DVD/Blu-ray player (unplug from power for a minute, then plug back in).
