SETUP

Connecting the Headset

The Gembird GHS-U-5.1-01 headset connects via a standard USB port.

1. Locate an available USB port on your computer.
2. Plug the USB connector of the headset into the USB port.
3. Your operating system should automatically detect and install the necessary drivers. This process may take a few moments.
4. Once installed, the headset will be ready for use as an audio input and output device.

Audio Settings Configuration

For optimal 5.1 surround sound experience, you may need to configure your computer's audio settings.

1. **Windows:** Go to "Sound Settings" (right-click speaker icon in taskbar) > "Sound Control Panel" > "Playback" tab. Select the Gembird headset, click "Configure," and choose "5.1 Surround."
2. **macOS:** Go to "System Preferences" > "Sound" > "Output" tab. Select the Gembird headset.

OPERATING INSTRUCTIONS

Volume Control

The headset features an in-line remote control for easy volume adjustment.

- Use the "+" button to increase the volume.
- Use the "-" button to decrease the volume.

Microphone Usage

The adjustable microphone boom allows for precise positioning.

- Position the microphone approximately 1-2 inches from your mouth for clear voice capture.
- Use the microphone mute button on the in-line remote to toggle the microphone on or off.

Comfort Adjustment

Adjust the headband to fit comfortably on your head. The ear pads are designed for extended use.

MAINTENANCE

To ensure the longevity and performance of your headset, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the headset. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the headset in a clean, dry place away from extreme temperatures.
- **Cable Care:** Avoid sharp bends or excessive pulling on the USB cable to prevent damage.

TROUBLESHOOTING

No Sound or Microphone Not Working

- **Check USB Connection:** Ensure the USB connector is fully inserted into the port. Try a different USB port.
- **Check Volume Levels:** Verify that the volume on the in-line control, your computer's system volume, and application-specific volumes are not muted or set too low.
- **Check Audio Settings:** Confirm that the Gembird headset is selected as the default playback and recording device in your computer's sound settings.
- **Restart Computer:** Sometimes a simple restart can resolve driver or software conflicts.

Sound Quality Issues

- **Driver Update:** Ensure your operating system drivers are up to date.
- **Source Quality:** Poor audio quality may stem from the audio source itself. Test with different audio files or applications.
