Setup

1. Charging the Power Bank

Before first use, fully charge your GETIHU power bank. Connect the provided USB-A to USB-C cable to the power bank's USB-C port and the other end to a USB wall charger (not included). The LED display will show the charging progress, indicating 100% when fully charged.

Image: A detailed view of the GETIHU power bank's USB-C port with a charging cable inserted, illustrating its dual input/output functionality for convenient charging and recharging.

2. Charging Your Devices

Connect your device's charging cable to one of the power bank's USB-A or USB-C output ports. The power bank will automatically begin charging your device. The LED display will show the remaining battery percentage of the power bank.

Image: An overhead shot showing the GETIHU power bank connected to and simultaneously charging a tablet and two smartphones, demonstrating its multi-device charging capability.

Operating Instructions

Checking Battery Level

Simply press the power button once to activate the LED digital display. The screen will show the current battery percentage of the power bank. The display will turn off automatically after a few seconds to conserve power.

Simultaneous Charging

The power bank supports charging multiple devices at once. Connect your devices to the available USB-A and USB-C output ports. The Smart IC technology will optimize the charging speed for each connected device.

Image: A person holding a smartphone with the GETIHU power bank discreetly attached to its back, illustrating the compact and convenient nature of portable charging while on the move.

Maintenance

- Keep the power bank away from water, moisture, and extreme temperatures (both hot and cold).
- Avoid dropping, hitting, or disassembling the device.
- Clean the power bank with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Store the power bank in a cool, dry place when not in use. For long-term storage, charge it to about 50% every three months to preserve battery health.

Troubleshooting

Problem	Possible Cause	Solution
Power bank not charging	Cable issue, charger issue, power bank fault	Try a different USB-C cable and wall charger. Ensure connections are secure.
Device not charging from power bank	Power bank low on charge, cable issue, device compatibility	Check power bank's charge level. Try a different charging cable for your device. Ensure your device is compatible with standard USB charging.
Slow charging	Cable quality, device input limit, multiple devices charging	Use high-quality cables. Charging multiple devices simultaneously may reduce individual charging speeds.
LED display not working	Power bank completely drained, internal issue	Attempt to charge the power bank for an extended period. If issue persists, contact customer support.

Specifications
