Setup Guide

Follow these steps to set up your Rii Wireless Keyboard and Mouse Combo:

1. **Install Batteries:**
    - The keyboard requires 1 x AAA battery (not included). Open the battery compartment on the back of the keyboard and insert the battery, observing polarity.
    - The mouse requires 1 x AA battery (not included). Open the battery compartment on the back of the mouse and insert the battery, observing polarity.

2. **Locate the USB Receiver:** The wireless USB receiver is conveniently stored inside the battery compartment of the mouse. Gently pull it out.
3. **Connect the Receiver:** Plug the USB receiver into an available USB port on your computer, laptop, or compatible device.
4. **Automatic Connection:** The keyboard and mouse should automatically connect to your device. No additional drivers are typically required.

Operating Instructions

Once set up, your Rii Wireless Keyboard and Mouse are ready for use.

Keyboard Usage

- The keyboard features a standard full-size layout with number keys and multimedia function keys (F1-F12).

- Press the function keys (F1-F12) directly or in combination with the "Fn" key for specific multimedia controls, depending on your operating system and software.
- The keyboard is designed for comfortable typing with ergonomic key caps.

Mouse Usage and DPI Adjustment

- The wireless optical mouse offers precise tracking.
- It features 3 adjustable DPI (Dots Per Inch) settings: 800, 1200, and 1600 DPI.
- To change the DPI, press the DPI button located on the top of the mouse, usually below the scroll wheel. Each press will cycle through the available DPI settings, allowing you to adjust cursor sensitivity to your preference.

Power Saving Features

- The combo supports 2.4G wireless connectivity for a stable connection up to 10 meters.
- Both the keyboard and mouse feature an auto-sleep function to conserve battery life when not in use. To wake them up, simply press any key on the keyboard or move/click the mouse.

Maintenance

To ensure the longevity and optimal performance of your Rii Wireless Keyboard and Mouse Combo, follow these maintenance tips:

- **Cleaning:** Use a soft, dry cloth to wipe down the surfaces of the keyboard and mouse. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the internal components. Avoid harsh chemicals or abrasive cleaners.
- **Battery Replacement:** Replace batteries when performance degrades or the low battery indicator (if present) illuminates. Always use fresh, good quality batteries of the specified type (AAA for keyboard, AA for mouse).
- **Storage:** When not in use for extended periods, remove the batteries to prevent leakage. Store the devices in a cool, dry place away from direct sunlight and extreme temperatures.
- **USB Receiver:** Keep the USB receiver in a safe place when not plugged into your device. It can be stored in the

mouse's battery compartment for convenience.

Troubleshooting

If you encounter issues with your Rii Wireless Keyboard and Mouse Combo, try the following solutions:

Problem	Possible Solution
Keyboard or mouse not responding	Ensure batteries are correctly installed and not depleted. Replace if necessary. Check if the USB receiver is securely plugged into a working USB port. Try a different USB port. Move the keyboard/mouse closer to the USB receiver to rule out range issues. Restart your computer.
Mouse cursor erratic or not moving smoothly	Clean the optical sensor on the bottom of the mouse. Ensure you are using the mouse on a suitable surface (not highly reflective or transparent). Adjust the DPI setting using the DPI button on the mouse.
Lag or delayed response	Reduce the distance between the devices and the USB receiver. Avoid placing the receiver near other wireless devices (e.g., Wi-Fi routers, cordless phones) that might cause interference. Ensure there are no large metal objects between the devices and the receiver.
Keyboard keys not working	Check battery level and replace if low. Ensure the keyboard is within range of the USB receiver. If specific keys are not working, check for debris under the keycap.

Specifications

Feature	Detail
Brand	Rii
Model	RK904
Connectivity Technology	2.4GHz Wireless (USB Receiver)
Effective Distance	8-10 meters
Keyboard Layout	Standard Full-size with Number Keys
Keyboard Battery	1 x AAA battery (not included)
