

Naviforce NF9182

Naviforce NF9182 Analog Digital Watch User Manual

Brand: Naviforce | Model: NF9182

PRODUCT OVERVIEW

The Naviforce NF9182 is a sophisticated analog-digital watch designed for men, combining classic style with modern functionality. It features a precise imported Japanese quartz movement, ensuring accurate timekeeping and reliable long-term performance. The watch is built with a durable zinc alloy metal case that resists fading and is protected by high-hardness mineral glass, making it suitable for daily wear. Its comfortable and adjustable stainless steel strap adds to its robust design.

Key Features:

- **High Quality Movement:** Equipped with an imported Japanese quartz movement for precise time display and extended operational life.
- **Water Resistance:** Rated water resistant up to 30 meters (3ATM), suitable for daily splashes, hand washing, and rain. Not intended for swimming, diving, showering, or prolonged water immersion.
- **Durable Construction:** Features a fade-resistant zinc alloy metal case, high-hardness mineral glass for effective wear protection, and a comfortable, adjustable stainless steel strap ideal for everyday use.
- **Multi-functional Display:** The watch displays time, day, date, and calendar. It includes an alarm, shock resistance, a stopwatch (chronograph), and an LED backlight for clear visibility in dark environments.

SETUP

Setting the Time:

1. Pull the crown (the knob on the side of the watch) out to the second click position.
2. Turn the crown to adjust the hour and minute hands to the desired time.
3. Push the crown back to its normal (initial) position to start the timekeeping.

Setting the Date:

1. Pull the crown out to the first click position.
2. Turn the crown to set the date.
3. **Important Note:** Do not set the date between 9:00 PM and 1:00 AM, as this may interfere with the automatic date change mechanism.
4. Push the crown back to its normal (initial) position.

General Tip:

If the date changes during the day (at noon instead of midnight), it indicates that the AM/PM setting was incorrect. To correct this, advance the hour hand by 12 hours.

OPERATING INSTRUCTIONS

Using the Backlight:

The watch features an LED backlight for improved visibility in low-light conditions. Press the 'LIGHT' button (typically located on the top left side of the watch case) to illuminate the digital display. The backlight will remain on for a few seconds, allowing you to read the time clearly in the dark.

FUNCTION DESCRIPTION

Comparison of the watch display in normal conditions versus with the LED backlight activated for visibility in the dark.

Chronograph (Stopwatch) Function:

To use the stopwatch function, press the 'START' button (typically on the top right). Press it again to pause the timing. To reset the stopwatch to zero, press the 'RESET' button (typically on the bottom right) while the stopwatch is paused.

Alarm Function:

The watch includes an alarm feature. Refer to the digital display's mode settings to activate and set the alarm time. Once set, the alarm will sound at the designated time. Consult the digital module's specific instructions for detailed alarm setting procedures.

MAINTENANCE AND CARE

Water Resistance:

Your Naviforce NF9182 watch is water resistant up to 30 meters (3ATM). This means it can withstand splashes, rain, and brief immersion like hand washing. However, it is **not** designed for swimming, diving, showering, or any activities involving prolonged exposure to water or high-pressure water jets. Always ensure the crown is fully pushed in to maintain water resistance.

The Naviforce NF9182 watch shown with water splashes, demonstrating its 3ATM water resistance for everyday use.

Cleaning:

To clean your watch, wipe the case and strap with a soft, damp cloth. For the stainless steel strap, a mild soap solution can be used, followed by thorough rinsing and drying. Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish.

Battery Replacement:

The watch is powered by a Lithium Ion battery, which is included. When the watch stops or the digital display fades, it may be time for a battery replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and maintain water resistance.

TROUBLESHOOTING

Problem	Possible Cause / Solution
---------	---------------------------

Problem	Possible Cause / Solution
Watch hands not moving / Digital display off	Battery may be depleted. Replace battery. Ensure crown is fully pushed in.
Date changes at noon instead of midnight	AM/PM setting is incorrect. Advance the hour hand by 12 hours to correct the cycle.
Water condensation inside watch	Crown may not have been fully pushed in, or seals may be compromised. Avoid further water exposure and seek professional service.
Buttons not responding	Ensure the watch is not in a locked mode (if applicable). If issue persists, battery may be low or internal mechanism may require service.

SPECIFICATIONS

- **Manufacturer:** Naviforce
- **Item Model Number:** NF9182
- **ASIN:** B08B34RX1K
- **Department:** Men's
- **Movement:** Imported Japanese Quartz
- **Water Resistance:** 30 Meters (3ATM)
- **Case Material:** Zinc Alloy Metal
- **Crystal Material:** High-Hardness Mineral Glass
