- Keep small parts and packaging materials away from children and pets to prevent choking hazards.
- Place the table on a flat, stable surface to prevent tipping.
- Avoid placing hot items directly on the table surface without protective coasters.

Before assembly, verify that all components are present and undamaged. If any parts are missing or damaged, please contact customer support.

SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is required for this product. It is recommended to have two people for assembly. Clear a spacious area for assembly and lay out all parts on a soft, clean surface to prevent scratches.

Recommended Tools:

- Allen Key (often included)
- Phillips Head Screwdriver

General Assembly Steps:

1. Identify all parts and hardware by comparing them to the included parts list in your instruction sheet.
2. Attach cam bolts to the designated panels. Ensure they are tightened securely.
3. Connect panels using dowels and cam locks. Insert dowels into pre-drilled holes, then align and press panels together. Secure with cam locks by turning them clockwise with a screwdriver until tight.
4. Assemble the base structure first, ensuring all connections are firm and stable.
5. Attach the upper tier to the base structure, following the specific diagram in your instruction sheet.
6. Once fully assembled, gently lift and place the table in its desired location. Do not drag the table, as this can damage the legs or joints.

OPERATING INSTRUCTIONS (USAGE)

The Omega 2 Step Chairside End Table is designed for indoor use as a functional and decorative piece of furniture. It features two tiers for storage and display.

- **Placement:** Position the table in your desired location, ensuring it is not obstructing walkways or doors.
- **Weight Distribution:** Distribute weight evenly across the surfaces. Avoid placing heavy objects on the edges or corners.
- **Surface Use:** Use the top surface for lamps, drinks (with coasters), books, or decorative items. The lower tier provides additional storage for magazines, remote controls, or small bins.

MAINTENANCE AND CARE

Proper care will extend the life and appearance of your end table.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Spills:** Clean spills immediately to prevent staining or damage to the engineered wood.
- **Sunlight:** Avoid prolonged exposure to direct sunlight, which can cause fading or discoloration.
- **Heat and Moisture:** Protect the surface from excessive heat and moisture. Always use coasters under beverages and heat pads under hot dishes.
- **Hardware:** Periodically check and tighten all assembly hardware to ensure the table remains stable.

TROUBLESHOOTING

Table is Wobbly:

- Ensure all screws and cam locks are fully tightened.
- Verify that the table is placed on a level surface. Adjust with furniture pads if necessary.

Parts Do Not Align During Assembly:

- Double-check that you are using the correct parts for each step as indicated in the instruction diagram.
- Ensure all cam bolts are inserted straight and fully into their respective holes.
- If pre-drilled holes appear misaligned, contact customer support for assistance. Do not attempt to force parts together or drill new holes unless explicitly instructed, as this may damage the product and void the warranty.
