PACKAGE CONTENTS

Ensure all items are present in the package:

- The G-Lab Keyz Palladium AZERTY Wired Gaming Keyboard
- USB Cable (integrated)
- Keycap Puller
- User Manual (this document)

SETUP

1. **Connect the Keyboard:** Plug the integrated USB cable of the Keyz Palladium keyboard into an available USB port on your computer or gaming console (PC, PS4, Xbox One).

2. **Driver Installation:** The keyboard is plug-and-play. Your operating system (Windows) will automatically detect and install the necessary drivers. No additional software installation is required for basic functionality.
3. **Optional Software Installation:** For advanced customization, including macro programming and detailed RGB lighting control, download the dedicated software from The G-Lab official website. Follow the on-screen instructions for installation.
4. **Attach Wrist Rest:** The magnetic wrist rest can be easily attached to the bottom front edge of the keyboard for enhanced ergonomic comfort during use. Align the magnetic points and gently push until it clicks into place.

OPERATING INSTRUCTIONS

Backlighting Control

The Keyz Palladium features customizable RGB backlighting with 11 effects and 7 colors.

- **Change Lighting Mode:** Press **FN + 1-0** (number keys above the AZERTY layout) to cycle through 11 different RGB lighting modes.
- **Change Static Color:** In static color modes, press **FN + INS** to cycle through 7 available colors.
- **Adjust Brightness:** Press **FN + Page Up** (PgUp) to increase brightness, and **FN + Page Down** (PgDn) to decrease brightness.
- **Adjust Speed:** For dynamic lighting modes, press **FN + '-'** to decrease speed, and **FN + '='** to increase speed.
- **Turn Backlight On/Off:** Press **FN + Scroll Lock** (ScrLk) to toggle the backlighting.

Macro Programming

The Keyz Palladium supports up to 12 programmable macros via its dedicated software. Download and install the software from The G-Lab website to access these features.

- Launch the G-Lab Keyz Palladium software.
- Navigate to the 'Macro' section.

- Select a macro key and record your desired sequence of keystrokes and delays.
- Save and apply the macro to your keyboard profile.
- The software also allows managing 5 different profiles, enabling quick switching between customized settings for various games or applications.

Image: Screenshot of the Keyz Palladium customization software, showing options for 11 lighting modes, 12 macros, and 5 different profiles.

Multimedia and Windows Shortcuts

The keyboard includes 12 multimedia shortcuts and various programmable Windows shortcuts.

- **Multimedia Keys:** Use **FN + F1-F12** for quick access to media controls (e.g., volume, play/pause, track skip).
- **Windows Lock:** Press **FN + Windows Key** to disable the Windows key, preventing accidental interruptions during gaming.

Image: Close-up of the Keyz Palladium keyboard highlighting the anti-ghosting capability on 26 keys and the FN + Windows key combination for Windows Lock.

Anti-Ghosting

The Keyz Palladium features 26-key anti-ghosting, allowing you to press up to 26 keys simultaneously without any conflicts or missed inputs, crucial for fast-paced gaming.

MAINTENANCE

Proper maintenance ensures the longevity and performance of your keyboard.

- **Cleaning:** Disconnect the keyboard before cleaning. Use a soft, dry cloth to wipe the surface. For deeper cleaning, use a can of compressed air to remove dust and debris from between the keys. A slightly damp cloth can be used for stubborn stains, but ensure no liquid enters the keyboard.
- **Keycap Removal:** Use the provided keycap puller to carefully remove keycaps for thorough cleaning or replacement. Insert the puller onto the keycap and gently pull upwards.

- **Storage:** Store the keyboard in a cool, dry place away from direct sunlight and extreme temperatures when not in use for extended periods.
- **Durability:** The Keyz Palladium is constructed from reinforced ABS thermoplastic, designed to be robust and shock-resistant. The keys have a lifespan of 30 million keystrokes.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Keyboard not responding	Loose USB connection, faulty USB port, driver issue.	Ensure USB cable is securely connected. Try a different USB port. Restart your computer. Check Device Manager for driver issues.

Problem	Possible Cause	Solution
Backlighting not working	Backlight turned off, brightness set to minimum, software conflict.	Press FN + Scroll Lock to toggle backlight. Increase brightness with FN + Page Up . Check software settings if installed.
Keys not registering or ghosting	Dust/debris under keycap, software issue, hardware defect.	Clean under keycaps using the keycap puller and compressed air. Ensure no liquid spills. If issue persists, contact support.
Macros not working	Software not running, macro not saved/applied, incorrect key assignment.	Ensure the G-Lab software is running in the background. Verify macros are correctly programmed and saved within the software. Check active profile.
Wrist rest detaches easily	Improper attachment, magnetic wear.	Ensure the wrist rest is properly aligned with the keyboard's magnetic points. If magnets are worn, contact support.
