## 2. SETUP GUIDE

### 2.1 Package Contents

Verify that all items are present in the package:

- 1x Ulefone Note 16 Pro Smartphone
- 1x AC Power Charger Adapter (100~240V / US plug)
- 1x Data Cable (100cm)
- 1x Phone Case
- 1x Protective Film

### 2.2 SIM Card and TF Card Installation

The device supports dual Nano SIM cards and one TF (Micro SD) card simultaneously.

1. Locate the SIM card tray on the side of the phone.
2. Insert the SIM ejector tool into the small hole next to the tray and push gently to eject the tray.
3. Place your Nano SIM cards and TF card into the designated slots on the tray. Ensure the gold

contacts face downwards.

4. Carefully reinsert the tray into the phone until it clicks into place.

Image 2.1: Illustration of the triple card slot design, accommodating two Nano SIM cards and one TF card.

## 2.3 Initial Power On and Network Configuration

Press and hold the power button until the Ulefone logo appears. Follow the on-screen instructions to complete the initial setup, including language selection, Wi-Fi connection, and Google account setup. For network connectivity, ensure your SIM card's frequency bands are compatible. The Ulefone Note 16 Pro supports:

- **2G GSM:** B2/3/5/8
- **3G WCDMA:** B1/2/4/5/8
- **4G LTE-FDD:** B1/2/3/4/5/7/8/12/17/19/20/28A/28B

*Note: The product information indicates compatibility with most GSM Networks like T-Mobile and Metro PCS, but not with AT&T, Cricket, or CDMA carriers such as Verizon, Sprint, and Boost Mobile. This information was originally provided for the Ulefone Note 9P, please verify compatibility for your specific Note 16 Pro model with your carrier.*

If your device cannot connect to data, you may need to manually input APN settings. Insert your operator's SIM, then navigate to **Settings > Network & internet > Mobile network > Advanced > Access point Names**. Here you can add or edit APN settings. Contact your network operator for the correct APN parameters.

## 3. OPERATING INSTRUCTIONS

### 3.1 Android 13 Operating System

The Ulefone Note 16 Pro runs on Android 13, offering an intuitive user experience with enhanced privacy controls, improved notifications, and a personalized interface.

# Android 11

Try the Newest Android OS

Image 3.1: The smartphone screen showcasing the Android operating system interface. (Note: While the image displays 'Android 11', the Ulefone Note 16 Pro operates on Android 13).

## 3.2 Camera Usage

The device features a 50MP primary rear camera, a 5MP macro lens, and a 2MP lens, along with an 8MP front camera. Open the Camera application to access various shooting modes, including macro photography.

# Octa-Core Processor

## 3.3 Security Features

The Ulefone Note 16 Pro includes Face Unlock and a Fingerprint ID for secure access.

- **Face Unlock:** Register your face in the security settings. The front camera will scan your face to unlock the device.
- **Fingerprint ID:** Register your fingerprint using the sensor, typically located on the rear or side of the device.

Your browser does not support the video tag.

Video 3.1: An official product video demonstrating features of the Ulefone Note 9P, including the waterdrop screen, triple camera, battery, processor, face unlock, fingerprint ID, and SIM card slots. While this video specifically references the Note 9P, many features are similar across Ulefone models.

## 4. MAINTENANCE

---

### 4.1 Battery Care

The Ulefone Note 16 Pro is equipped with a 4500mAh Lithium-Polymer battery. To prolong battery life:

- Avoid extreme temperatures.
- Use the provided charger and data cable.
- Do not let the battery completely drain frequently.
- For optimal performance, keep the battery charge between 20% and 80%.

### 4.2 Storage Management

The device comes with 512GB of internal storage (Note: Specifications list 64GB internal storage and 4GB RAM, while feature bullets state 16GB RAM + 512GB ROM. Please refer to your specific device packaging for exact storage). You can expand storage up to 256GB using a Micro SD card. Regularly clear unnecessary files and applications to maintain optimal performance.

## 5. TROUBLESHOOTING

---

### 5.1 Network Connection Issues

If you experience issues with network connectivity, ensure your SIM card is correctly inserted and your APN settings are configured as described in Section 2.3. Restarting the phone can often resolve temporary network glitches.

### 5.2 Device Unresponsive

If the device becomes unresponsive, press and hold the power button for approximately 10-15 seconds to force a restart.

### 5.3 Other Issues

For other issues not covered here, please refer to the official Ulefone support resources or contact customer service.
