Fazley FLP-DIY

Fazley FLP-DIY Black Electric Guitar Kit Instruction Manual

INTRODUCTION

This manual provides comprehensive instructions for assembling, operating, and maintaining your Fazley FLP-DIY Black Electric Guitar Kit. This kit is designed for enthusiasts who wish to build their own electric guitar. Please read all instructions carefully before beginning assembly to ensure proper construction and optimal performance.

ASSEMBLY INSTRUCTIONS

The Fazley FLP-DIY kit requires assembly of various components. Follow these steps carefully.

1. Component Inspection

Before starting, unpack all components and verify that all parts are present and undamaged. Familiarize yourself with the guitar body, neck, and hardware.

Image: Front view of the pre-finished black electric guitar body, showing routed cavities for pickups and controls.

Image: Rear view of the pre-finished black electric guitar body, showing the control cavity.

Image: Front view of the guitar neck, featuring a dark fretboard with trapezoid position markers.

Image: Rear view of the guitar neck, showing the headstock with pre-drilled holes for tuning machines.

OPERATING YOUR ELECTRIC GUITAR

Tuning

Use an electronic tuner to accurately tune your guitar. Standard tuning from thickest to thinnest string is E-A-D-G-B-e.

Amplification

Connect your guitar to an amplifier using a standard instrument cable. Adjust the volume and tone controls on the guitar and amplifier to achieve your desired sound.

Pickup Selector

The pickup selector switch allows you to choose between different pickups (neck, bridge, or both) to vary your guitar's tone.

MAINTENANCE

Cleaning

Regularly wipe down the guitar body, neck, and strings with a soft, clean cloth. Use guitar-specific cleaning products for the finish and fretboard as needed. Avoid abrasive cleaners.

String Replacement

Replace strings regularly, typically every 1-3 months depending on usage, or when they sound dull or show signs of corrosion. Replace one string at a time to maintain neck tension.

Storage

Store your guitar in a stable environment, away from extreme temperature changes and humidity fluctuations, to prevent damage to the wood.

TROUBLESHOOTING

- **No Sound:** Check all cable connections (guitar to amp, power to amp). Ensure the guitar's volume knob is turned up and the pickup selector is engaged. Verify all wiring connections inside the guitar are correct and soldered properly.
- **Buzzing/Humming:** This can be caused by improper grounding in the wiring, unshielded cavities, or external electrical interference. Review your wiring connections.
- **Poor Tuning Stability:** Ensure tuning machines are securely fastened. Check that strings are properly wound around the tuning posts. A properly cut nut and bridge setup are also crucial.
- **Fret Buzz:** This often indicates low string action or uneven frets. Adjust the bridge saddle height or consult a guitar technician for fret leveling if necessary.

SPECIFICATIONS

Feature	Detail
---------	--------

Product Dimensions (L x W x H)	74.5 x 51 x 8.5 cm
Item Weight	4.3 Kilograms
Body Material	Mahogany
Neck Material	Mahogany
Fretboard Material	Rosewood
Color	Black
Number of Strings	6
Scale Length	25.0 inches
String Material	Nickel
Bridge System	Fixed or Tremolo (Kit includes fixed bridge type)
