- Always ensure all components are securely locked in place before placing a child in the playard or using any of its functions.
- Discontinue use of the newborn bassinet and infant bassinet when the child begins to push up on hands and knees, or has reached the maximum weight of 19 pounds, whichever comes first.
- The diaper changer is intended for infants up to 19 pounds. Never leave a child unattended on the changing table.
- Always provide adequate supervision when your child is in the playard.
- Do not add extra padding or mattresses to the playard, bassinet, or changer, as this can create a suffocation hazard.
- Keep the playard away from open flames, heaters, or other heat sources.
- Regularly inspect the playard for any signs of wear, damage, or missing parts. Do not use if any parts are broken or missing.

- Ensure the breathable mesh sides are free from tears or holes to prevent entrapment.

- **Inspection:** Periodically check all fasteners, straps, and locking mechanisms to ensure they are secure and in good working order.

- **Playard Appears Lopsided:** Ensure all four top rails are fully locked and the bottom is completely flat. Check that the wheels are properly aligned and not obstructed.
