## MEWANG 30.9" L x 18.5" W x 25.6" H - 4 steps

# MEWANG Wooden Dog Stairs/Steps Instruction Manual

Model: 30.9" L x 18.5" W x 25.6" H - 4 steps

## INTRODUCTION

The MEWANG Wooden Dog Stairs/Steps are designed to provide a safe and convenient way for your pets to access elevated surfaces such as beds, sofas, and vehicles. This versatile product features a 2-in-1 convertible design, allowing it to function as both a four-step staircase and a ramp. Its sturdy wood construction ensures durability and stability for pets up to 110 pounds. The steps are covered with fabric for comfortable, non-skid access, and the unit is lightweight and foldable for easy storage and portability.

The MEWANG Wooden Dog Stairs/Steps, shown in its primary four-step configuration, designed to assist pets in reaching elevated surfaces.

## SAFETY INFORMATION

Always ensure the pet stairs are placed on a stable, level surface before use. The product is designed to support pets up to 110 pounds. Do not exceed this weight limit. The non-skid feet and fabric-covered surfaces are intended to provide traction for your pet's paws, but always supervise your pet during initial use to ensure they are comfortable and secure. Regularly inspect the stairs for any signs of wear or damage, and discontinue use if any issues are found.

## SETUP

The MEWANG Wooden Dog Stairs/Steps come pre-assembled and do not require any additional setup. Simply unfold the unit to your desired configuration (stairs or ramp) and ensure the locking mechanisms are securely engaged before allowing your pet to use it.

Official MEWANG video demonstrating the unboxing, setup, and conversion of the pet stairs from flat-packed to stairs and ramp configurations, highlighting its ease of use and portability.

## OPERATING INSTRUCTIONS

The MEWANG pet stairs offer a versatile 2-in-1 design, functioning as both a staircase and a ramp. To convert between modes, simply adjust the steps. For the staircase configuration, ensure each step is locked into place, creating a stable ascent for your pet. For the ramp configuration, fold the steps flat to create a continuous incline. This mode is particularly suitable for cats and medium to large-sized dogs, but may be too steep for small dogs.

# 2-IN-1 Convertible Design

Converts simply From 4-Steps To a Ramp

This image illustrates the simple mechanism for converting the pet stairs between its four-step configuration and a flat ramp, providing versatility for different pet needs.

The pet stairs are designed for elevated surfaces up to 25.6 inches high. Always ensure the height of the surface your pet is accessing is compatible with the stairs to prevent strain or injury.

## PRODUCT SIZE

### ★ Ergonomic Step Heights for Easy & Safe Climbing

The image demonstrates the MEWANG pet stairs positioned next to a bed, indicating its suitability for elevated surfaces up to 25.6 inches high, with a maximum weight recommendation of 150 lbs.

## MAINTENANCE

To maintain the longevity and appearance of your MEWANG pet stairs, regular cleaning is recommended. The wooden frame can be wiped clean with a damp cloth and mild soap, then dried thoroughly. The fabric-covered steps can be vacuumed to remove pet hair and debris. For deeper cleaning of the fabric, a pet-safe spot cleaner can be used, following the product's instructions. Avoid using harsh chemicals or abrasive materials that could damage the wood or fabric.

## TROUBLESHOOTING

## Pet Reluctance to Use Stairs/Ramp

Some pets may be hesitant to use the stairs or ramp initially. Encourage them with positive reinforcement, such as treats and praise. Guide them gently up and down the steps/ramp a few times. Consistency and patience are key. For older or injured pets, the ramp configuration might be more comfortable than the stairs.

LBS

This graphic highlights the versatility of the pet stairs as a mobility aid for various pet conditions, including injured, short-legged, and older dogs, emphasizing its supportive design.

## Stability Issues

Ensure the pet stairs are fully extended and the support mechanisms are locked into place. The non-skid feet are designed to prevent slipping on various floor types. If the stairs still feel unstable, check that all screws are tightened and the unit is placed on a flat, even surface. Avoid placing the stairs on thick, uneven carpets that might compromise stability.

## SPECIFICATIONS

Feature	Detail
Model Name	30.9" L x 18.5" W x 25.6" H - 4 steps
Dimensions (L x W x H)	30.9" x 18.5" x 25.6"
