CUISUNYO 1800W

CUISUNYO Portable 1800W Double Induction Cooktop Instruction Manual

Model: 1800W | Brand: CUISUNYO

Introduction

Thank you for choosing the CUISUNYO Portable 1800W Double Induction Cooktop. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new appliance. Please read it thoroughly before first use and retain it for future reference.

Safety Information

Your safety is paramount. Please observe the following precautions:

- The CUISUNYO induction cooktop is ETL listed, ensuring it meets North American safety standards.
- Always use compatible cookware. The cooktop generates a magnetic field that requires cookware made of cast iron or magnetic stainless steel. A magnet is included for easy compatibility testing.
- The auto-pan detection feature will automatically shut off the unit if incompatible cookware is detected or if no cookware is present, enhancing safety.
- Ensure the cooktop is placed on a stable, flat surface with adequate ventilation.
- Do not touch the cooking surface immediately after use, as residual heat may be present. The 'Please Don't Touch' warning is visible on the surface.

Product Features

- **Portable Design:** Operates on a standard 120V/1800W outlet, lightweight for easy storage and portability, ideal for various settings including dorm rooms and RVs.
- **Power Sharing Technology:** When using a single burner, it delivers 100% of its wattage. When both burners are in use, the wattage is evenly split between them, providing flexible cooking options.

- **User-Friendly Operation:** Digital controls allow selection from 1-10 power and temperature levels, with options for both Fahrenheit and Celsius.
- **Compatible Cookware:** Works with cast iron and magnetic stainless steel pans. Auto-pan detection ensures safety.

Setup

Before first use, ensure the cooktop is placed on a dry, stable, and heat-resistant surface. Plug the 4.9 ft power cord into a standard 120V/1800W electrical outlet. Ensure there is sufficient clearance around the unit for proper ventilation.

Operating Instructions

Control Panel Overview

Figure 2: Detailed diagram of the control panel. It labels the Crystal Ceramic Glass Top, On/Off Button, Adjustment Buttons (+ and -), Power Button, Temperature Button, Time Button, Temp/Power/Time indicator Light, and Display Window.

1. **Power On/Off:** Press the power button to turn the unit on or off.
2. **Selecting Cooking Mode:** Use the 'P' (Power) button to switch between power levels or the 'Temp' button to switch between temperature settings (Fahrenheit/Celsius).
3. **Adjusting Settings:** Use the '+' and '-' buttons to increase or decrease power/temperature levels.
4. **Timer Function:** Press the 'Time' button to activate the timer. Use '+' and '-' to set the desired cooking duration.

Power Sharing

The cooktop features intelligent power sharing. When only one burner is active, it utilizes the full available wattage. When both burners are in use, the total wattage is distributed between them. This allows for efficient cooking while managing power consumption.

Cookware Compatibility

Only magnetic cookware is compatible with induction cooktops. This includes cast iron, enameled iron, and magnetic stainless

steel. Non-magnetic materials like aluminum, copper, glass, or ceramic will not work. Use the provided magnet to test your cookware: if the magnet sticks firmly to the bottom of your pot or pan, it is compatible.

Figure 3: Illustration demonstrating auto-pan detection and cookware compatibility. It shows a magnet sticking to a compatible pan and not sticking to an incompatible pan, with a text description of suitable materials like cast iron, enameled iron, and stainless steel.

Figure 4: Visual guide to compatible cookware, including cast iron pans, stainless steel pots, and enameled cast iron. It also indicates a maximum capacity of 25 lbs per zone and compatible diameters of 4.8 to 10.2 inches.

Video 1: This video provides a general overview of the CUISUNYO 1800W Double Induction Cooktop, demonstrating its features and basic operation. It highlights the ease of use and the dual cooking zones.

Maintenance and Cleaning

The cooktop features a premium crystal ceramic surface designed for easy cleaning. After the unit has cooled down completely, wipe the surface with a damp cloth and mild detergent. Avoid abrasive cleaners or scouring pads that could scratch the surface. Ensure the unit is unplugged before cleaning.

Figure 5: A hand wiping the crystal ceramic surface of the induction cooktop with a cloth, illustrating the ease of cleaning.

Troubleshooting

If you encounter issues with your cooktop, please check the following:

- **Unit not turning on:** Ensure the cooktop is properly plugged into a functioning 120V/1800W outlet.
- **Cooktop not heating:** Verify that your cookware is induction-compatible (magnetic). The auto-pan detection will prevent heating if incompatible cookware is used or if no pan is present.
- **Error codes:** Refer to the display window for any error codes. Consult the full user manual (if provided separately) for specific error code meanings and solutions.
- **Uneven heating:** Ensure the cookware base is flat and makes full contact with the cooking zone.

Specifications

Feature	Detail
Brand	CUISUNYO
Model	1800W
Color	Black
Material	Carbon Steel
Heating Elements	2
Product Dimensions	14"D x 23.6"W x 2.4"H
Wattage	1800 Watt-hours
Controls Type	Button Switch
Voltage	120 Volts
