5. MAINTENANCE

5.2 Wheel and Zipper Care

Periodically check the spinner wheels for any accumulated dirt, hair, or debris. Clean them gently to ensure

smooth operation. Lubricate the wheel axles with a silicone-based spray if they become stiff. For zippers, apply a small amount of zipper lubricant or wax to keep them running smoothly.

6. TROUBLESHOOTING

6.1 Handle Issues

If the telescopic handle becomes difficult to extend or retract, ensure no items are obstructing its mechanism inside the lining. Clean any visible dirt or debris from the handle shafts. If the issue persists, avoid forcing the handle and contact customer support.

6.2 Wheel Sticking

If a wheel is not spinning freely, check for tangled hair, string, or other foreign objects. Carefully remove any obstructions. If the wheel is damaged, it may require professional repair or replacement.

6.3 Zipper Malfunction

If a zipper is stuck, try gently wiggling the slider back and forth. Do not force it. Ensure the fabric is not caught in the zipper teeth. Applying a small amount of lubricant can often resolve minor sticking issues.
