MAINTENANCE

Battery Replacement

Replace batteries when the remote's display becomes dim or the remote no longer controls the air conditioner effectively. Always replace both batteries at the same time with new ones of the same type (AAA).

Cleaning

Wipe the remote control with a soft, dry cloth. Do not use liquid cleaners or abrasive materials, as they may damage the remote's surface or internal components.

TROUBLESHOOTING

- **Remote not responding:**
 - Check if batteries are inserted correctly with correct polarity.
 - Replace old batteries with new ones.
 - Ensure there are no obstructions between the remote and the air conditioner's receiver.
 - Confirm the remote is pointed directly at the air conditioner's receiver.
 - Try resetting the remote by pressing the RESET button with a pointed object.
- **Certain functions not working:**
 - This replacement remote may not support all functions of your original air conditioner remote. Refer to your air conditioner's original manual for specific features.
