Lumino Cordless Room Darkening Mini Blinds User Manual

Model: 08-6426-001

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Lumino Cordless Room Darkening Mini Blinds. Designed for indoor windows, these blinds feature durable vinyl slats and a cordless operation for enhanced safety and ease of use. They are water and moisture resistant, making them suitable for various rooms.

SETUP AND INSTALLATION

Proper measurement and installation are crucial for optimal performance and appearance of your Lumino blinds. Mounting hardware is included with your purchase.

1. Measuring Your Window

Lumino blinds are precision-cut to ensure a perfect fit. It is essential to measure your window accurately before ordering. The ordered width will result in a blind that is 0.5 inches narrower to accommodate inside mounting.

For Inside Mount:

- **Width:** Measure the width of the window frame at the top, middle, and bottom. Record the *smallest* measurement.
- **Height:** Measure the height of the window frame at the left, center, and right. Record the *tallest* measurement. Round up to the next available length when ordering.
- For best fit, blinds ordered will include a 0.5-inch width deduction.

How to Measure: **Inside** mount

1

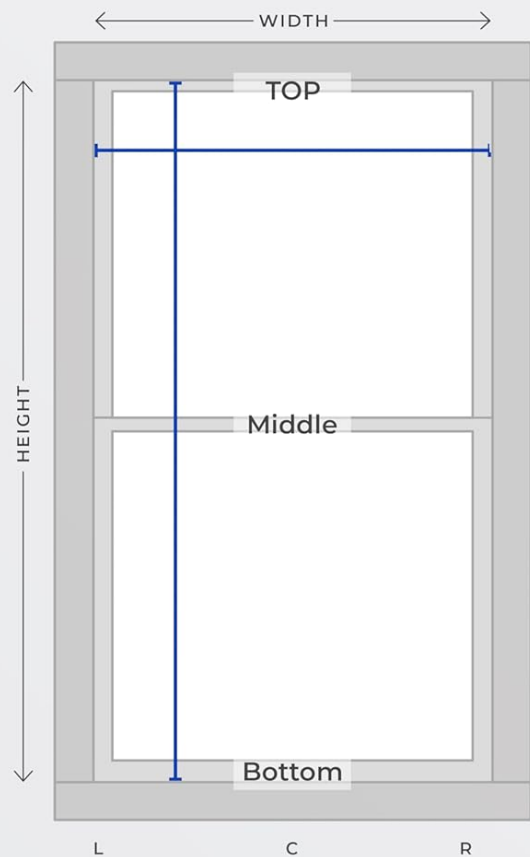

WIDTH: Measure the width of the window frame at the Top, Middle, and Bottom. Record the smallest measurement.

2

HEIGHT: Measure the height of the window frame at the left, center, and right. Record the tallest measurement. Round up to next available length when ordering.

3

FOR BEST FIT: Blinds ordered will include a 1/2-inch width deduction.

EXAMPLE

If you order a 18" W x 64" L blind, you will receive a 17.5" W x 64" L blind.

INSIDE MOUNT

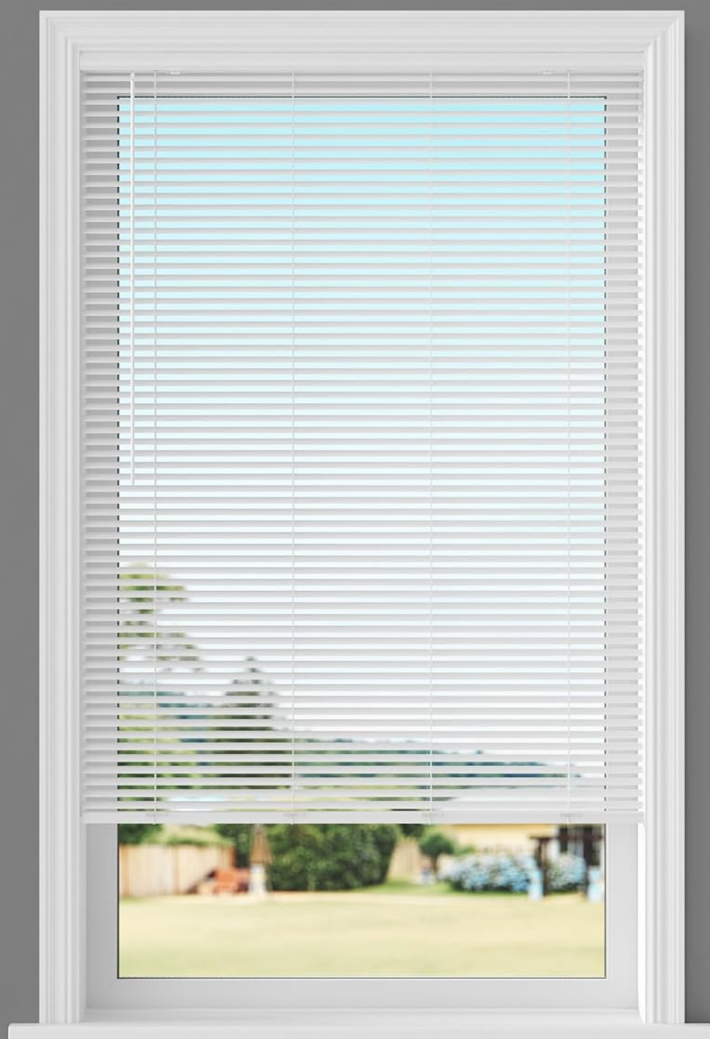

Image: Example of Lumino blinds installed using an inside mount, showcasing a clean and integrated look.

For Outside Mount:

- **Width:** Measure the top, middle, and bottom of the area you want to cover. Add at least 1.5 inches on each side (3 inches total) to prevent light gaps. Use the largest width measurement, then add 0.5 inches for the deduction.
- **Height:** Measure the left, center, and right of the area you want to cover. Add at least 1.5 inches above the window to avoid light gaps. Use the longest height measurement.
- Order using the final width and height measurements.

How to Measure: Outside mount

1

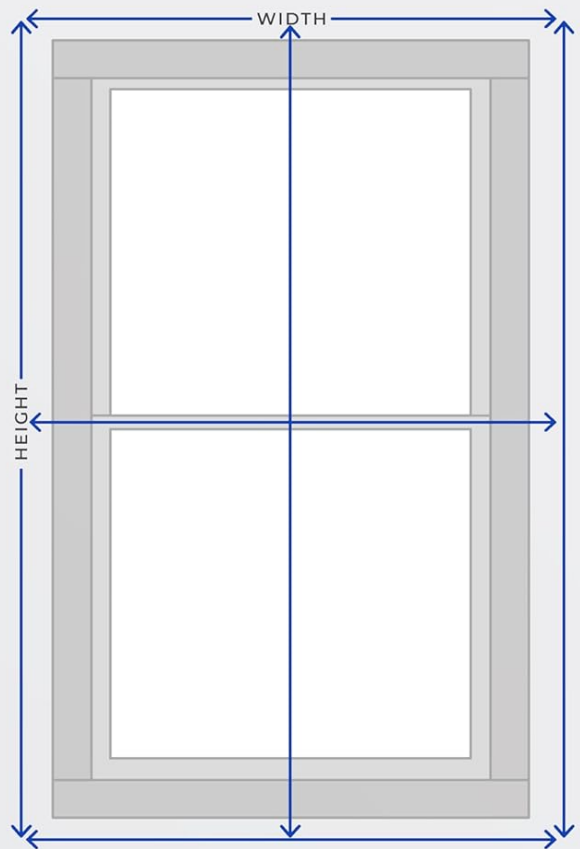

WIDTH: Measure the top, middle, and bottom of the area you want to cover. Add at least 1.5" on each side (3" total) to prevent light gaps. Use the largest width measurement, then add 0.5" for the deduction.

2

HEIGHT: Measure the left, center, and right of the area you want to cover. Add at least 1.5" above the window to avoid light gaps. Use the longest height measurement.

3

ORDER: Use the final width and height measurements to order your blinds.

EXAMPLE

If you order a 18" W x 64" L blind, you will receive a 17.5" W x 64" L blind.

2. Installation Steps

Installation is designed to be straightforward. Follow these general steps:

1. Mark the positions for the mounting brackets. Ensure they are level and spaced appropriately for the blind's width.
2. Drill pilot holes for the screws at the marked locations.
3. Secure the mounting brackets using the provided hardware. For wider blinds, a third support bracket may be necessary.
4. Carefully snap the blind's headrail into the installed brackets. Ensure it is securely clicked into place.
5. Attach the valance (if applicable) to the front of the headrail for a finished look.

OPERATING YOUR BLINDS

Lumino Cordless Mini Blinds are designed for safe and easy operation, making them Certified Best for Kids. They feature a cordless lift system and a wand for slat tilting.

Raising and Lowering:

To raise or lower the blinds, simply grasp the bottom rail and gently push up or pull down to the desired position. The cordless mechanism will hold the blinds in place.

Ergonomic Bottom Rail

MAINTENANCE

To keep your Lumino blinds looking their best, follow these simple cleaning instructions:

- Wipe clean with a dry or slightly damp cloth.
- Avoid using harsh chemicals or abrasive cleaners, as these may damage the vinyl material.

TROUBLESHOOTING

If you encounter any issues with your Lumino blinds, consider the following common points:

- **Blinds not holding position:** Ensure the bottom rail is grasped firmly and moved smoothly. The cordless mechanism relies on consistent movement.
- **Slats not tilting correctly:** Check if the wand is securely attached and rotate it fully in both directions to ensure proper engagement with the tilting mechanism.

- **Installation issues:** Verify that the mounting brackets are level and securely fastened. Refer to the "Setup and Installation" section for detailed measuring and installation guidelines.
