1. PRODUCT OVERVIEW

The Bytech Light-Up Gaming Combo is a comprehensive 4-in-1 kit designed to enhance your PC gaming experience. This kit includes a customizable keyboard, an ergonomic mouse, a stereo headset, and a large gaming mousepad. Each component is engineered for performance and comfort, featuring vibrant light-up elements to create an immersive gaming atmosphere.

Image 2: Detailed view of the Bytech Light-Up Gaming Combo Kit components and their features as displayed on the product packaging.

Kit Contents:

- **Customizable Keyboard:** Features multicolor backlighting for enhanced visibility and aesthetics.
- **Ergonomic Mouse:** A 3-button scroll-wheel mouse with multicolor backlighting, designed for comfortable use.
- **Stereo Headset:** Equipped with 40mm surround sound and blue backlighting for immersive audio.
- **Gaming Mousepad:** A large mousepad with rubber grips to ensure stability during intense gaming sessions.

2. SETUP INSTRUCTIONS

Follow these steps to connect your Light-Up Gaming Combo to your computer.

1. **Connect the Keyboard:** Locate an available USB port on your computer. Insert the USB connector of the keyboard firmly into the USB port. The keyboard's backlight should illuminate upon successful connection.
2. **Connect the Mouse:** Locate another available USB port on your computer. Insert the USB connector of the mouse firmly into the USB port. The mouse's backlight should illuminate, and the cursor should become responsive.
3. **Connect the Headset:** The headset typically uses a 3.5mm audio jack for sound and a separate 3.5mm jack for the microphone, or a single combined 3.5mm jack. Some headsets may also have a USB connector for lighting.
 - If your headset has two 3.5mm jacks (one for audio, one for mic), plug them into the corresponding audio output (green) and microphone input (pink) ports on your computer.
 - If your headset has a single combined 3.5mm jack, plug it into the combined audio/mic port on your computer or a compatible adapter.
 - If your headset has a USB connector for lighting, plug it into an available USB port. The blue backlight should activate.
4. **Driver Installation (Automatic):** For most modern operating systems (Windows, macOS), the devices are plug-and-play and will install necessary drivers automatically. Wait a few moments for the system to recognize and configure the new hardware.
5. **Test Functionality:**
 - Type on the keyboard to ensure all keys are responsive.
 - Move the mouse and click buttons to verify cursor movement and button functionality.
 - Play audio through the headset and test the microphone to ensure sound input and output are working correctly.

3. OPERATING INSTRUCTIONS

Keyboard Operation:

The keyboard features standard QWERTY layout keys and function keys. The multicolor backlight automatically activates upon connection. Specific lighting modes or brightness adjustments may be controlled via dedicated function key combinations (e.g., Fn + Scroll Lock, Fn + Page Up/Down). Refer to the keyboard's specific key legends for detailed lighting controls.

Mouse Operation:

The ergonomic mouse includes left-click, right-click, and a scroll wheel that also functions as a middle-click button. The multicolor backlight on the mouse is typically static or cycles automatically. Ensure the mousepad is placed on a flat, stable surface for optimal tracking performance.

Headset Operation:

The headset provides stereo audio output and includes an integrated microphone.

- **Audio Playback:** Adjust volume using your computer's sound settings or any inline volume controls on the headset cable.
- **Microphone:** Ensure the microphone is positioned correctly near your mouth for clear voice capture. You may need to select the headset microphone as the default input device in your computer's sound settings.
- **Blue Backlight:** The headset's blue backlight activates when the USB connector (if present) is plugged in.

4. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your gaming combo.

- **Cleaning:** Use a soft, dry cloth to wipe down the keyboard, mouse, and headset. For stubborn dirt, a slightly damp cloth with mild soap can be used, but ensure no liquid enters the devices. Do not use harsh chemicals or abrasive cleaners.
- **Dust Removal:** Use compressed air to remove dust and debris from between keyboard keys and mouse crevices.
- **Cable Care:** Avoid sharp bends or excessive pulling on the cables to prevent damage.
- **Storage:** Store the devices in a cool, dry place away from direct sunlight and extreme temperatures when not in use.

5. TROUBLESHOOTING

If you encounter issues with your Light-Up Gaming Combo, try the following solutions:

- **Device Not Responding:**
 - Ensure all USB and audio cables are securely plugged into the correct ports.
 - Try plugging the devices into different USB ports on your computer.
 - Restart your computer.
 - Check your computer's Device Manager (Windows) or System Information (macOS) to see if the devices are recognized.
- **Lights Not Working:**
 - Verify that the devices are properly connected.
 - For the keyboard, check if any lighting control keys (e.g., Fn + Scroll Lock) have been pressed to turn off the lights.
 - Ensure the headset's USB connector (if applicable) is plugged in for its blue backlight.
- **No Sound from Headset / Microphone Not Working:**
 - Check your computer's sound settings to ensure the headset is selected as the default playback and recording device.
 - Adjust the volume levels on your computer and any inline volume controls on the headset.
 - Ensure the microphone is not muted in your system settings or on the headset itself.
 - Test the headset on another device if possible to rule out a computer-specific issue.
- **Mouse Cursor Jumps or is Erratic:**
 - Ensure the mouse sensor is clean and free of debris.
 - Use the mouse on a clean, flat surface, preferably the included mousepad.

6. SPECIFICATIONS

Feature	Detail
Brand	Bytech
Model Number	BY-GA-KT-100-BK
Item Weight	10.4 ounces
Package Dimensions	10 x 2.7 x 2 inches
Color	Black
Manufacturer	Bytech
ASIN	B08C93XNMS
Date First Available	July 2, 2020
