## Bestway 60001

# Lay-Z-Spa® Miami AirJet™ Inflatable Hot Tub Spa User Manual

Model: 60001 | Brand: Bestway

## INTRODUCTION

---

Welcome to the Lay-Z-Spa® Miami AirJet™ Inflatable Hot Tub Spa user manual. This guide provides essential information for the safe and efficient operation, setup, maintenance, and troubleshooting of your new hot tub. The Lay-Z-Spa Miami AirJet is designed for 2-4 persons, offering a relaxing bubble massage experience with its AirJet system and a water heating capability up to 40°C (104°F).

## SAFETY INFORMATION

---

Please read and understand all safety warnings and instructions before installing and using this product. Failure to follow these instructions could result in injury or death.

- Always supervise children around the hot tub.
- Do not operate the hot tub if the water temperature exceeds 40°C (104°F).
- Consult a doctor before use if you have health conditions, are pregnant, or are elderly.
- Ensure the hot tub is placed on a flat, stable surface capable of supporting its weight when filled.
- Do not use extension cords with the hot tub pump.
- Always disconnect the power supply before performing any maintenance.
- Keep all electrical components dry and away from water.

## SETUP INSTRUCTIONS

---

Follow these steps for the initial setup of your Lay-Z-Spa Miami AirJet hot tub.

1. **Site Selection:** Choose a flat, level surface free of sharp objects. Ensure the area can support the weight of the filled spa (approximately 669 L / 177 gal of water plus occupants).
2. **Unpacking:** Carefully remove all components from the packaging: 1 spa liner, 1 cover, 1 spa pump, 1 filter cartridge (VI), 1 ChemConnect dispenser, and 1 repair patch.

3. **Inflation:** Connect the spa pump to the hot tub's inflation valve. Use the pump to inflate the hot tub until it is firm to the touch but not over-inflated.
4. **Pump Connection:** Connect the spa pump to the hot tub liner using the provided hoses. Ensure all connections are secure.
5. **Filling:** Fill the hot tub with water to the recommended fill line. The water capacity is approximately 669 liters (177 gallons) at 80% capacity.
6. **Power Connection:** Plug the spa pump into a grounded electrical outlet. Do not use extension cords.
7. **ChemConnect Dispenser:** Attach the ChemConnect dispenser to the spa's outlet nozzle. This dispenser is designed to evenly distribute chlorine.

## OPERATING INSTRUCTIONS

---

Learn how to operate your hot tub's features for an optimal experience.

- **Digital Control Panel:** The easy-to-reach digital control panel allows you to manage all functions.
- **Heating Water:** Press the heater button on the control panel to begin heating the water. The spa can heat water up to 40°C (104°F). The Freeze Shield automatic heating function protects the pump and liner from damage due to cold weather.
- **AirJet™ System:** Activate the AirJets to release warm air into the water, providing a calming bubble massage.
- **Power Saving Timer:** Utilize the power saving timer to control the temperature of your spa up to 40 days in advance, optimizing energy consumption.
- **Filtration System:** The integrated water filtration system helps keep the water clean. Ensure the filter cartridge (Type VI) is installed correctly.

## MAINTENANCE

---

Regular maintenance is crucial for the longevity and hygiene of your hot tub.

- **Water Chemistry:** Use the ChemConnect dispenser to maintain a stable level of chlorine in the water. Regularly test water chemistry and adjust as needed.
- **Filter Cartridge:** Clean the filter cartridge (Type VI) regularly, ideally after each use or daily, depending on usage. Replace the cartridge every few weeks or when it becomes visibly dirty.
- **Liner Cleaning:** Periodically clean the interior and exterior of the hot tub liner. Use a soft cloth and mild, non-abrasive cleaner.
- **Cover Care:** The reinforced cover holds in heat when the spa isn't in use. Keep the cover clean and secure it with the buckles to prevent debris from entering the spa and to maintain water temperature.
- **Draining:** When not in use for extended periods or for deep cleaning, drain the hot tub completely using the drain valve.

## **TROUBLESHOOTING**

---

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
Spa not heating	Low water level; Filter clogged; Heater error.	Ensure water is above minimum fill line. Clean or replace filter cartridge. Check control panel for error codes and consult manual.
AirJets not working	Pump not powered; AirJet button not pressed.	Ensure pump is plugged in and powered on. Press the AirJet button on the control panel.
Water is dirty/cloudy	Dirty filter; Imbalanced water chemistry; Infrequent water changes.	Clean or replace filter cartridge. Test and adjust water chemistry (chlorine, pH). Drain and refill spa as needed.
Spa losing air	Leak in liner; Valve not sealed.	Locate leak and use provided repair patch. Ensure inflation valve is securely closed.
