## 6. MAINTENANCE & CARE

---

- **Cleaning:** Wipe the bed frame with a dry, soft cloth. Avoid using abrasive cleaners, harsh chemicals, or excessive moisture, as these can damage the engineered wood and melamine finish.
- **Dusting:** Regularly dust the surfaces to prevent buildup.
- **Fastener Checks:** Every 3-6 months, inspect all assembly hardware (bolts, screws) and retighten if they have loosened.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading or discoloration of the wood finish.
- **Humidity Control:** Maintain a stable room temperature and humidity level to prevent warping or cracking of the wood.

## 7. TROUBLESHOOTING

---

## Squeaking Noises:

If the bed makes squeaking noises, it is often due to loose connections. Carefully inspect all bolts and screws, especially where the side rails connect to the headboard and footboard, and tighten them securely. Ensure the bed slats are properly seated and not rubbing against the frame.

## Bed Feels Unstable:

Check that the bed is placed on a level surface. Verify that all assembly hardware is fully tightened. If the issue persists, disassemble and reassemble the bed, ensuring all steps are followed correctly.
