5. Operating Instructions

To operate your SEVERIN Raclette Party Grill:

- 1. Preheating:** Turn the rotary control knob to the 'MAX' position. The control light will illuminate, indicating the appliance is heating. Allow the grill to preheat for approximately 10-15 minutes to reach the desired temperature, especially for the natural stone plate.
- 2. Temperature Control:** Once preheated, you can adjust the temperature using the rotary control knob between 'MIN' and 'MAX' to suit your cooking needs.
- 3. Using the Natural Stone Plate:** Lightly grease the stone plate with a small amount of cooking oil before placing food items like meat, fish, or vegetables directly onto it for grilling.
- 4. Using the Raclette Pans:** Place desired ingredients (e.g., cheese, vegetables, small pieces of meat) into the non-stick raclette pans. Slide the pans under the heating element for baking and melting.
- 5. Serving:** Use wooden or heat-resistant plastic spatulas to remove food from the stone plate and raclette pans to avoid scratching the non-stick coating.
- 6. Switching Off:** After use, turn the rotary control knob to the 'MIN' position and unplug the appliance from the wall outlet. Allow the grill to cool down completely before cleaning.

6. Maintenance and Cleaning

Regular cleaning ensures the longevity and hygiene of your raclette grill.

- **Always unplug the appliance and allow it to cool completely before cleaning.**
- **Natural Stone Plate:** Once cooled to lukewarm, place a damp cloth over the stone to loosen any stuck-on food. Scrape off larger residues with a wooden or plastic spatula. Clean with warm water and a soft sponge. Avoid harsh detergents as the stone is porous. Dry thoroughly.
- **Raclette Pans:** The non-stick pans can be easily cleaned with warm soapy water and a soft sponge. Avoid abrasive cleaners or metal scouring pads to protect the non-stick coating.
- **Base Unit:** Wipe the exterior of the base unit with a damp cloth. Do not immerse the base unit in water.
- **Storage:** Store the clean and dry appliance in a safe place, away from moisture.

7. Troubleshooting

If you encounter issues with your raclette grill, refer to the following table:

Problem	Possible Cause	Solution
Appliance does not heat up.	Not plugged in; power outlet faulty; rotary control not turned on.	Check power plug; test outlet with another appliance; turn rotary control to 'MAX'.
Food sticks to the stone plate.	Plate not sufficiently greased; plate not hot enough.	Lightly grease the stone plate before use; allow sufficient preheating time.
Smoke or unusual odor during first use.	Residual manufacturing oils burning off.	This is normal for first use. Ensure good ventilation. It should dissipate quickly.
