Usage Guidelines

- **Mattress Compatibility:** Use full-size mattresses that fit snugly within the bed frame. Recommended

mattress thickness is 8-10 inches.

- **Weight Limits:** Do not exceed the maximum weight capacity of 250 lbs for the upper bunk and 450 lbs for the lower bunk.
- **Top Bunk Access:** Always use the integrated stairway to access the top bunk. Do not jump on or off the bed.
- **Guardrail Use:** Ensure the guardrails are always in place and secure when the top bunk is in use.
- **Drawer Usage:** The under-bed drawers are designed for light storage of items like bedding, clothes, or toys. Avoid overloading them.
- **Stairway Shelves:** The shelves integrated into the stairway are suitable for books or small decorative items. Do not place heavy or fragile items that could fall.

Care and Maintenance

Proper care and maintenance will extend the life and appearance of your Bellemave bunk bed.

- **Cleaning:** For general cleaning, wipe the wood surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the finish.
- **Spills:** Immediately wipe up any spills with a clean, dry cloth to prevent staining or damage to the wood.
- **Hardware Check:** Periodically check all bolts, screws, and connections to ensure they remain tight. Re-tighten if necessary to maintain structural integrity and safety.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause wood to fade or crack. Position the bed away from direct sunlight if possible.
- **Humidity Control:** Maintain a consistent humidity level in the room to prevent wood from expanding or contracting, which can lead to cracks or warping.

Troubleshooting

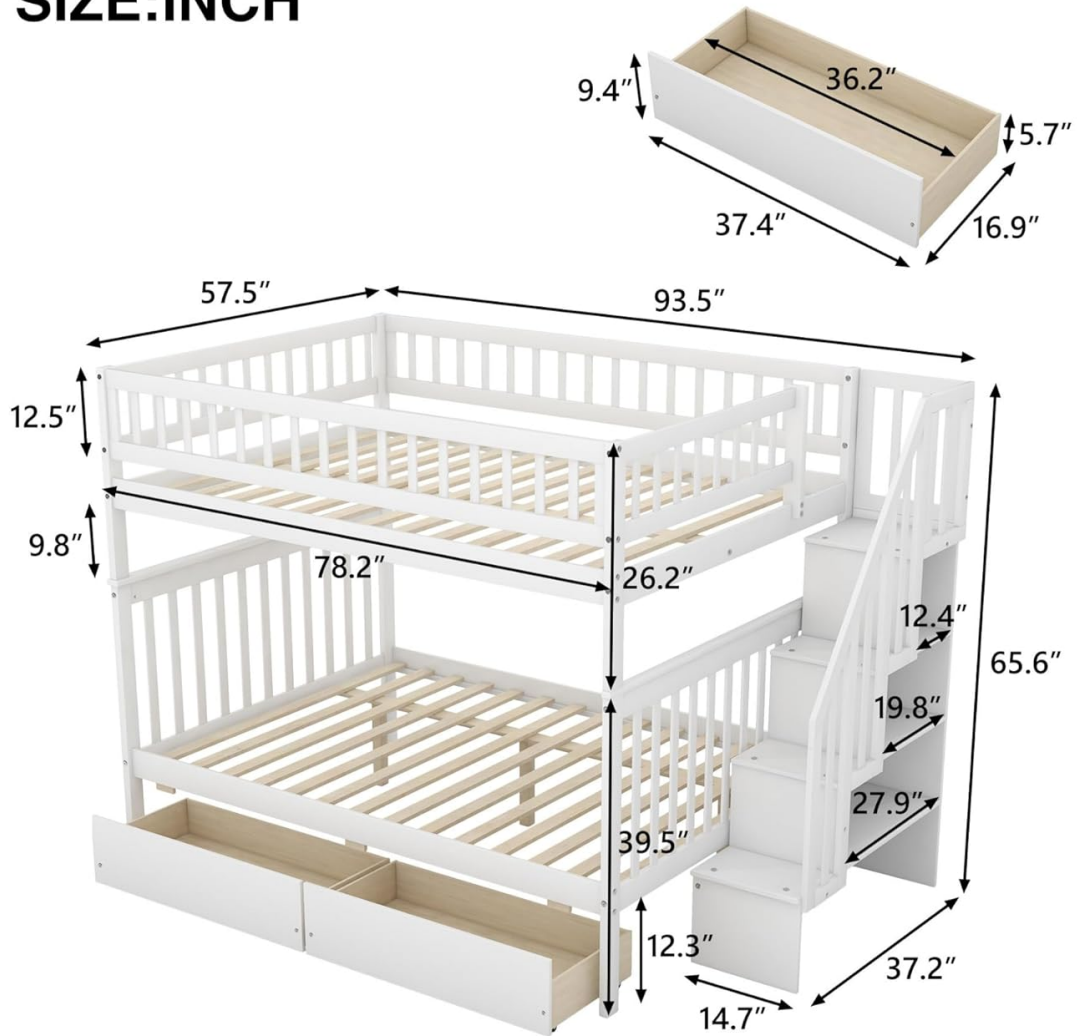

If you encounter any issues with your bunk bed, refer to the common problems and solutions below:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware connections.	Check and tighten all bolts, screws, and fasteners. Ensure the bed is on a level surface.
Squeaking noises.	Loose connections or friction between wood parts.	Tighten all hardware. If squeaking persists, apply a small amount of paraffin wax or silicone spray to contact points between wood pieces (avoiding areas that bear weight).
Drawers do not slide smoothly.	Obstruction in the drawer slides or misaligned drawers.	Check for any debris in the drawer tracks. Ensure drawers are properly aligned on their wheels/slides.
Missing or damaged parts upon delivery.	Shipping damage or packaging error.	Do not attempt to assemble. Contact Bellemave customer support immediately with your purchase details.
