5. MAINTENANCE

To ensure the longevity and optimal performance of your remote control, follow these maintenance guidelines:

- **Cleaning:** Wipe the remote control regularly with a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid excessive moisture.
- **Battery Care:** Replace batteries when the remote's response becomes sluggish or stops working. Remove batteries if the remote will not be used for an extended period to prevent leakage.
- **Storage:** Store the remote in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity.
- **Avoid Drops:** Protect the remote from physical impact, as drops can damage internal components.

6. TROUBLESHOOTING

If you encounter issues with your remote control, refer to the following troubleshooting steps:

- **Remote Not Responding:**

- Ensure there is a clear line of sight between the remote control and the TV's infrared receiver.
- Check if the batteries are inserted correctly with the correct polarity (+/-).
- Replace the batteries with new ones. Weak or depleted batteries are a common cause of unresponsiveness.

- **Buttons Unresponsive:**

- Clean the remote control, especially around the buttons, to remove any dirt or debris that might be obstructing them.
- If specific buttons are consistently unresponsive after cleaning and battery replacement, the remote may require replacement.

- **Limited Functionality:**

- Verify that your TV model is listed as compatible with this remote control (refer to the compatibility list in Section 2 or product packaging).
- Ensure no other devices are interfering with the IR signal.
