### Key Features:

- Detailed 3D Detroit skyline inside a water globe.
- Constructed from durable poly resin and glass materials.

- Compact size suitable for display on shelves, desks, or mantels.
- Ideal as a collectible souvenir or a gift for various occasions.

## SETUP

The ZIZO Detroit Skyline 3D Water Snow Globe requires no assembly or complex setup. It is ready for display directly out of its packaging.

1. Carefully remove the snow globe from its packaging.
2. Inspect the globe for any visible damage or leaks. If any damage is observed, do not use the product and contact customer support.
3. Place the snow globe on a stable, flat surface away from direct sunlight, extreme temperatures, or areas where it might be easily knocked over.

## OPERATING INSTRUCTIONS

This snow globe is a decorative item and does not require any operational steps beyond placement. To activate the "snow" effect:

- Gently shake the globe to agitate the glitter particles within the water.
- Observe the particles slowly settling, simulating a snowfall effect over the Detroit skyline.

*Note: Avoid vigorous shaking or dropping the globe, as this may cause damage.*

## MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your snow globe.

- **Cleaning:** To clean the exterior of the globe and base, gently wipe with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish or the globe material.
- **Storage:** If storing the snow globe, keep it in its original packaging or a padded box to prevent damage. Store in a cool, dry place away from direct sunlight and extreme temperature fluctuations.
- **Temperature:** Avoid exposing the snow globe to extreme hot or cold temperatures, as this can cause the liquid inside to expand or contract, potentially leading to leaks or damage to the internal components. Do not place near heat sources or in direct sunlight for extended periods.

## TROUBLESHOOTING

Most issues with a decorative snow globe are related to physical damage or environmental factors.

Problem	Possible Cause	Solution
Cloudy Water / Discoloration	Exposure to direct sunlight or extreme temperatures; internal degradation.	Relocate the globe to a cooler, shaded area. If discoloration persists, the internal liquid may be compromised, and the item cannot be repaired.
Leaking Globe	Cracked glass or seal failure due to impact or temperature stress.	Immediately place the globe on a protective surface to contain any liquid. Discontinue use. Leaks are generally not repairable.

Problem	Possible Cause	Solution
Particles Not Settling Properly	Air bubble inside the globe (minor); incorrect liquid viscosity.	A small air bubble is normal. If the issue is significant, it may indicate a manufacturing defect. No user-serviceable parts.

For issues not listed here, or if solutions do not resolve the problem, please contact customer support.
