LYFRO VESO

LYFRO VESO Smart Foaming Soap Dispenser User Manual

Model: VESO

INTRODUCTION

Thank you for choosing the LYFRO VESO Smart Foaming Soap Dispenser. This automatic, touchless dispenser is designed to provide a hygienic and convenient handwashing experience. Please read this manual carefully before use to ensure proper operation and maintenance.

SETUP

1. **Unpacking:** Carefully remove all components from the packaging. Ensure the dispenser unit and any included accessories are present.
2. **Battery Installation/Charging:** The dispenser includes a Lithium-ion battery. Before first use, ensure the device is fully charged. Connect the provided charging cable to the charging port on the side of the dispenser and to a suitable USB power source. The indicator light will show charging status.

3. Filling the Soap Reservoir:

- Twist the top section of the dispenser counter-clockwise to separate it from the transparent soap reservoir.
- Pour liquid foaming soap directly into the reservoir. For best results, use foaming soap. If using regular liquid soap, dilute it with water at a ratio of 1:3 (1 part soap to 3 parts water) and mix gently. Do not shake vigorously.
- Do not overfill. Ensure the soap level is below the maximum fill line.

- Align the top section with the reservoir and twist clockwise to secure it firmly.

4. **Placement:** Place the dispenser on a flat, stable surface near a sink. Ensure there is enough space for hands to be placed under the nozzle without obstruction.

OPERATING INSTRUCTIONS

1. **Power On/Off:** Press and hold the power button (usually located on the top or back) for a few seconds to turn the dispenser on or off. An indicator light will confirm the status.
2. **Dispensing Soap:** Place your hand flat under the nozzle. The built-in infrared sensor will detect your hand and automatically dispense a measured amount of rich foam.

MAINTENANCE

- **Cleaning:** Wipe the exterior of the dispenser with a soft, damp cloth. Do not submerge the unit in water or rinse

- directly under a tap, as this can damage the electronic components. Avoid using abrasive cleaners or solvents.
- **Refilling:** When the soap level is low, follow the 'Filling the Soap Reservoir' steps in the Setup section.
 - **Long-Term Storage:** If the dispenser will not be used for an extended period, empty the soap reservoir, clean the unit, and ensure it is fully charged before storing in a cool, dry place.
 - **Battery Care:** Recharge the battery when the indicator light signals low power. Avoid completely draining the battery frequently to prolong its lifespan.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No foam dispensed	Low battery; Soap reservoir empty; Sensor obstructed; Soap too thick.	Charge the battery; Refill soap; Clean sensor area; Dilute soap with water.
Weak or inconsistent foam	Incorrect soap dilution; Air in pump; Low battery.	Adjust soap-to-water ratio; Run dispenser a few times to clear air; Charge battery.
Dispenser not turning on	Battery depleted; Power button not pressed correctly.	Charge the battery; Press and hold the power button for several seconds.
Leakage	Reservoir not sealed properly; Overfilled.	Ensure reservoir is twisted on tightly; Do not overfill.

SPECIFICATIONS

- **Model Number:** VESO
- **Brand:** LYFRO
- **Dimensions (L x W x H):** 11.5 x 6.83 x 4.04 cm
- **Weight:** 350 Grams
- **Battery:** 1 Lithium-ion (included)
- **Material:** Not specified (indicated as 'Sans contact' in source, implying touchless feature)
- **Color:** White
