OWLTRA EMZ30

OWLTRA Electric Mouse Trap User Manual

Model: EMZ30

1. PRODUCT OVERVIEW

The OWLTRA Electric Mouse Trap provides a humane and efficient solution for rodent control. Designed for indoor use, this trap utilizes high-voltage shock to instantly eliminate mice, ensuring a quick and effective process. Its advanced dual infrared sensors enhance safety by preventing accidental activation, making it suitable for households with children and pets. The trap's design also facilitates no-mess disposal, offering a hygienic way to manage captured rodents.

Figure 1: OWLTRA Electric Mouse Trap - A sleek, black electronic trap designed for effective rodent elimination.

2. SAFETY INFORMATION

- For indoor use only. Do not use outdoors or in wet environments.

- Keep out of reach of small children and pets. While designed with pet-safe sensors, direct contact with the trap's interior should be avoided.
- Do not touch the metal plates inside the trap when it is powered on.
- Always turn off the trap and remove batteries before cleaning or disposing of a captured rodent.
- Do not immerse the trap in water or any other liquid.
- Use only 4 AA batteries as specified. Do not mix old and new batteries or different types of batteries.

3. PACKAGE CONTENTS

- 1 x OWLTRA Electric Mouse Trap (Model: EMZ30)
- 1 x User Manual

4. SETUP

1. **Install Batteries:** Open the battery compartment cover located on the bottom of the trap. Insert 4 AA batteries, ensuring correct polarity (+/-). Close the battery compartment cover securely.
2. **Apply Bait:** Lift open the bait door at the back of the trap. Using a toothpick or cotton swab, apply a pea-sized amount of high-protein bait (e.g., peanut butter, hazelnut spread) onto the metal plate at the very back of the trap, opposite the entrance. Avoid touching the metal plate with your fingers. Close the bait door.

Figure 2: Bait Area - A view of the trap's interior showing the designated area for bait application.

3. **Placement:** Place the trap indoors in areas where rodent activity is suspected, such as along walls, in corners, or near entry points. Ensure the trap is placed on a flat, stable surface. The trap is designed for indoor use only.

High-Voltage Instant Kill

Figure 3: Indoor Placement - The trap positioned discreetly indoors, ready for use.

4. **Activate the Trap:** Slide the power switch to the "ON" position. A green light will flash briefly, indicating the trap is active and ready to catch.

5. OPERATING INSTRUCTIONS

Once activated, the OWLTRA Electric Mouse Trap uses dual infrared sensors to detect when a rodent enters the chamber and reaches the bait. Upon detection, the trap delivers a high-voltage shock (6,000-9,000V) for instant and humane elimination.

Indicator Lights:

- **Green Light:** A solid green light indicates a rodent has been successfully captured.
- **Red Light:** A solid red light indicates low battery and that the batteries need to be replaced.

Green:
Rodent Captured

Red:
Battery Low

Figure 4: Indicator Lights - Top view of the trap showing the green light for rodent captured and red light for low battery.

Disposal:

The trap features a no-mess disposal system. When the green light indicates a capture:

1. Ensure the trap is switched to the "OFF" position.
2. Carefully pull off the trap's lid. The trap automatically deactivates when the lid is removed for safety.
3. Empty the captured rodent directly into a trash receptacle without touching or seeing it.
4. Replace the lid securely.

Magnetic Latch, No-Mess Disposal

Figure 5: Magnetic Latch, No-Mess Disposal - The trap's two parts separated, illustrating the easy disposal mechanism.

6. MAINTENANCE AND CLEANING

- After each disposal, it is recommended to wipe down the interior metal plates with a dry paper towel or cloth to remove any residue.
- Do not use water or chemical cleaners inside the trap.
- Regularly check the bait and replenish as needed to maintain effectiveness.
- Replace batteries when the red indicator light illuminates to ensure continuous operation.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Trap not activating / No green light	Batteries are dead or incorrectly installed.	Check battery polarity. Replace with fresh 4 AA batteries.

Problem	Possible Cause	Solution
Rodents not entering the trap	Incorrect bait or insufficient bait. Trap placement is not optimal.	Use a high-protein bait like peanut butter. Ensure bait is placed at the very back. Relocate the trap to areas of high rodent activity, along walls.
Trap activates but no rodent is caught	Rodent may have escaped before shock, or sensor was triggered by non-rodent.	Ensure trap is on a stable surface. Verify bait is at the very back. The dual infrared sensors are designed to prevent false zaps, but ensure no debris or other objects are near the entrance.

8. SPECIFICATIONS

Feature	Detail
Brand	OWLTRA
Model Number	EMZ30
Color	Black
Material	Plastic
Product Dimensions	8"L x 3"W x 3"H
Item Weight	12 Ounces
Power Source	4 AA batteries (not included)
Target Species	Mouse, Rat
Recommended Use	House (Indoor)

9. WARRANTY AND SUPPORT

For warranty information and customer support, please refer to the documentation included with your purchase or visit the official OWLTRA website. You can also contact OWLTRA customer service directly for assistance with product inquiries, troubleshooting, or replacement parts.
