

ASUS USB-BT500

ASUS USB-BT500 Bluetooth 5.0 USB Adapter User Manual

Model: USB-BT500

1. PRODUCT OVERVIEW

The ASUS USB-BT500 is a compact Bluetooth 5.0 USB adapter designed to provide wireless connectivity for a wide range of devices. It upgrades your system to the latest Bluetooth 5.0 technology, offering enhanced speed and range compared to previous Bluetooth versions. This adapter is backward compatible with Bluetooth 2.1, 3.x, and 4.x devices, ensuring broad compatibility.

Image: The ASUS USB-BT500 Bluetooth 5.0 USB Adapter, a small black and gold device.

2. KEY FEATURES

- **Bluetooth 5.0 for Faster, Further Coverage:** Experience data transfer speeds up to twice as fast and a range up to four times greater in Bluetooth Low Energy (BLE) mode.
- **Wireless Connection, Free of Limitation:** Enables seamless wireless communication with various Bluetooth-enabled devices.
- **Full Compatibility:** Backward compatible with Bluetooth 2.1, 3.x, and 4.x standards.
- **Power Saving for Devices:** Utilizes Bluetooth Low Energy technology for efficient and energy-saving wireless connectivity.
- **Ultra-small Design:** Highly portable and easy to use, with a compact form factor.

Simply Insert, Simply Connect

Image: A diagram showing 'up to 2X Faster Data Transfer Rate' and 'up to 4X Wider Data Transfer Range' with Bluetooth Low Energy Mode.

3. WHAT'S IN THE BOX

Upon opening the package, you should find the following items:

- USB-BT500 Adapter
- Warranty card

4. SETUP GUIDE

4.1 Hardware Installation

1. Locate an available USB port on your desktop or laptop computer.
2. Carefully insert the ASUS USB-BT500 adapter into the USB port. Ensure it is fully seated.

Advanced Bluetooth 5 Adapter with High Portable Ultra-small Design

Image: The ASUS USB-BT500 adapter shown inserted into the USB port of a laptop.

4.2 Driver Installation

For most modern operating systems (Windows 10/11), the necessary drivers for the ASUS USB-BT500 will be installed automatically upon connecting the device. Please ensure your computer is connected to the internet during the initial setup to allow for automatic driver download and installation.

If automatic installation does not occur or if you experience issues, you may need to manually install drivers:

- Visit the official ASUS support website for the USB-BT500 model.
- Download the latest drivers compatible with your operating system.
- Follow the on-screen instructions to complete the driver installation.

Important Note: If your computer has existing built-in Bluetooth functionality, it is recommended to disable it in your system's Device Manager before installing the ASUS USB-BT500 to prevent potential conflicts.

5. OPERATING INSTRUCTIONS

5.1 Pairing Bluetooth Devices

Once the adapter is installed and drivers are active, you can pair your Bluetooth devices:

1. Ensure the Bluetooth adapter is plugged into your computer.
2. Go to your computer's Bluetooth settings (e.g., in Windows: Settings > Devices > Bluetooth & other devices).
3. Turn on Bluetooth if it's not already enabled.
4. Put your Bluetooth device (headphones, speaker, keyboard, mouse, controller, etc.) into pairing mode. Refer to your device's manual for specific instructions on how to do this.
5. On your computer, click "Add Bluetooth or other device" and select "Bluetooth".
6. Select your device from the list of discovered devices and follow any on-screen prompts to complete the pairing process.

Image: A laptop with the ASUS USB-BT500 adapter wirelessly connected to multiple Bluetooth devices.

5.2 General Usage Tips

- **Range:** While Bluetooth 5.0 offers extended range, obstacles like walls and other electronic devices can affect signal strength. For optimal performance, keep paired devices within reasonable proximity.
- **Interference:** Other wireless devices operating on the 2.4 GHz frequency (e.g., Wi-Fi routers, cordless phones) can cause interference. Try to minimize such interference for stable connections.
- **Multiple Devices:** The adapter supports connecting to multiple Bluetooth devices simultaneously, though performance may vary depending on the type and number of connected devices.

6. MAINTENANCE

The ASUS USB-BT500 adapter requires minimal maintenance:

- Keep the adapter clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the adapter to extreme temperatures, humidity, or direct sunlight.
- Do not attempt to disassemble or repair the adapter yourself, as this will void the warranty.
- Store the adapter in a safe place when not in use to prevent physical damage.

7. TROUBLESHOOTING

7.1 Adapter Not Recognized

- Try plugging the adapter into a different USB port on your computer.
- Restart your computer.
- Check Device Manager (Windows) to see if the Bluetooth adapter is listed and if there are any error indicators. If so, try updating or reinstalling the drivers.

7.2 Cannot Pair or Connect to Devices

- Ensure your Bluetooth device is in pairing mode and within range.
- Turn off and then turn on Bluetooth on your computer.
- Remove the device from your computer's Bluetooth settings and try pairing again.
- Check if there are other wireless devices causing interference.
- Ensure your computer's operating system is up to date.

7.3 Connection is Unstable or Choppy

- Reduce the distance between the adapter and the connected Bluetooth device.
- Remove any physical obstructions between the adapter and the device.
- Ensure there are no strong sources of interference nearby.
- Update the adapter's drivers to the latest version from the ASUS website.

8. SPECIFICATIONS

Model Number	USB-BT500
Hardware Interface	Bluetooth, USB
Bluetooth Version	5.0 (Backward compatible with 2.1/3.x/4.x)
Data Link Protocol	Bluetooth
Data Transfer Rate	Up to 4 Megabits Per Second
Product Dimensions	0.59 x 0.28 x 0.69 inches (1.5 x 0.7 x 1.75 cm)
Item Weight	0.16 ounces (4.54 g)
Color	Black
Compatible Devices	Desktop, Headphone, Laptop, Speaker, etc.
UPC	192876476772

9. WARRANTY AND SUPPORT

9.1 Warranty Information

This product comes with a warranty provided by ASUS. Please refer to the included warranty card for specific terms, conditions, and duration of the warranty. Keep your proof of purchase for warranty claims.

9.2 Customer Support

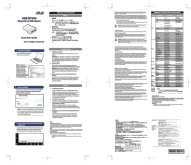

For technical assistance, driver downloads, or further support, please visit the official ASUS support website. You can typically find FAQs, troubleshooting guides, and contact information for customer service there.

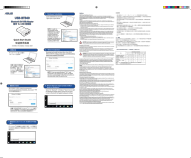

9.3 Legal Disclaimer

Actual data throughput and WiFi coverage will vary from network conditions and environmental factors, including the volume of network traffic, building material and construction, and network overhead, resulting in lower actual data throughput and wireless coverage.

- Power Generation
- Cryogenics

Do you want to improve your productivity? It is difficult to understand where to start? It is difficult to understand how much work you have used or welding work that has gone into a project? Then **WeldCloud® Productivity** is the right place to start.

WeldCloud® Productivity provides the tools you need to analyse your welding productivity, track consumption, and trace all of your welding down to each individual weld session.

Connect all your welding processes to **WeldCloud**. With the latest update of our **WeldCloud** applications, it is now possible to connect:

- MIG/MAG, TIG and Stick **WeldCloud** control first machines
- MIG/MAG and TIG/MAG heavy equipment and other tools with **WeldCloud** Inverter Controller
- ESAB wire welding with ESAB PFC controllers

Data from all these different areas will be accessible in the same application.

WeldCloud® Productivity Features:

- Track your arc time factor and net deposition rate and many other welding metrics
- Easy to use and intuitive dashboard
- Powerful report / analytic functionality with report subscription
- Full weld traceability of actual, set, and target values
- Remote ODI code scanning for full traceability (operator, wire ID, wire batch, WPS, gas, etc.)
- Intuitive aggregation of welding data

Visit [indusuite.com](https://www.indusuite.com) for more information.

WeldCloud Productivity

Improve your welding productivity

WeldCloud Productivity provides an overview of all your connected welding machines

- Transportation
- Mobile Equipment
- Ship / Bridge Building
- Pipe Mills
- Wind Tower
- Structural Steel Fabrication
- Offshore Oil
- Petrochemical
- Power Generation
- Cryogenics

Do you want to improve your productivity? It is difficult to understand where to start? It is difficult to understand how much work you have used or welding work that has gone into a project? Then **WeldCloud® Productivity** is the right place to start.

WeldCloud® Productivity provides the tools you need to analyse your welding productivity, track consumption, and trace all of your welding down to each individual weld session.

Connect all your welding processes to **WeldCloud**. With the latest update of our **WeldCloud** applications, it is now possible to connect:

- MIG/MAG, TIG and Stick **WeldCloud** control first machines
- MIG/MAG and TIG/MAG heavy equipment and other tools with **WeldCloud** Inverter Controller
- ESAB wire welding with ESAB PFC controllers

Data from all these different areas will be accessible in the same application.

WeldCloud® Productivity Features:

WeldCloud® Fleet

Welding Equipment Fleet Management System

Monitor all connected machines

- Transportation
- Mobile Equipment
- Ship/Bridge Building
- Pipe Mills
- Windtowers
- Steel Erectors
- Structural Steel Fabrication

The service tag provides you with what you need to plan for and follow up on your service and maintenance activities

WeldCloud® Fleet is a digital application designed to manage your fleet of welding equipment across one or multiple locations. Reduce downtime, manage maintenance and service, and monitor welding jobs for every machine in the fleet. **WeldCloud Fleet** provides the right set of tools to keep operators in control of connected ESAB equipment and other brands of welding machines. Use **WeldCloud Fleet** as a stand-alone service application or bundle with **WeldCloud Productivity** for a complete welding data analytic system.

Connect all your welding processes to **WeldCloud**. With the latest update of our **WeldCloud** applications, it is now possible to connect:

- MIG/MAG, TIG and Stick **WeldCloud** control first machines
- MIG/MAG and TIG/MAG heavy equipment and other tools with **WeldCloud** Inverter Controller
- ESAB wire welding with ESAB PFC controllers

Data from all these different areas will be accessible in the same application.

WeldCloud Fleet Features:

- Welding job management – manage your welding jobs across your complete welding fleet
- Service tag – jobs document and to coordinate about service, maintenance and calibration activities
- Remote software updates – no need for manual or USB upgrades, which can take hours or days
- GPS location of your welding equipment – know where all machines in your fleet are all times
- Event tag – early detection and notification of equipment issues
- Operator Management – manage your operator permissions across your fleet of welding machines

WeldCloud Fleet

Welding Equipment Fleet Management System

WeldCloud Fleet is a digital application designed to manage your fleet of welding equipment across one or multiple locations. Reduce downtime, manage maintenance and service, and monitor welding jobs for every machine in the fleet. WeldCloud Fleet provides the right set of tools to keep operators in control of connected CAD equipment and other brands of welding machines. Use WeldCloud Fleet as a stand-alone service application or bundle with WeldCloud Productivity for a complete welding data analytics system.

Connect all your welding processes to WeldCloud. With the latest update of our WeldCloud applications, it is now possible to connect:

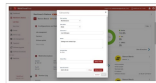

- MIG/MAG, TIG and Stick WeldCloud enabled CAD machines
- MIG/MAG and TIG CAD from equipment and other brands with WeldCloud Inverter Connect
- Stick and welding with CAD TIG connection

Data from all these different areas will be accessible in the same application.

WeldCloud Fleet Features:

- **Welding job management** - manage your welding jobs across your complete welding fleet
- **Service log** - info, document and to scheduled detail service, maintenance and calibration activities
- **Remote software upgrade** - no need for manual or USB upgrades, which can take hours or days
- **GPS location of your welding equipment** - know where all machines in your fleet are at all times
- **Event log** - early detection and notification of equipment issues
- **Operator Management** - manage your operator permissions across your fleet of welding machines

Visit indusuite.com for more information.

The service log provides you with what you need to plan for and follow up with your service and maintenance activities.
