# HERCHR 34oz Stainless Steel Oil Dispenser Bottle User Manual

Model: HERCHRiz3s1k47v5-01

## 1. INTRODUCTION

This manual provides instructions for the safe and effective use of your HERCHR 34oz Stainless Steel Oil Dispenser Bottle. Please read this manual thoroughly before first use and retain it for future reference.

The HERCHR oil dispenser is designed for storing and pouring various liquid condiments such as olive oil, cooking oil, vinegar, and soy sauce. Its stainless steel construction ensures durability and a leak-proof design for a clean kitchen experience.

## 2. PRODUCT FEATURES

- **Material:** Constructed from 304 stainless steel for durability and rust resistance.
- **Capacity:** 34oz (approximately 1000ml) for ample storage.
- **Leak-Proof Design:** Features a sealing ring and a non-drip spout to prevent spills and waste.
- **Easy Pouring:** Long spout design for controlled and smooth dispensing.
- **Dustproof Cover:** Protects the spout from dust and contaminants.
- **Easy to Clean:** Designed for convenient hand washing or dishwasher cleaning.
- **Anti-Slip Base:** Provides stability on kitchen surfaces.

## 3. SAFETY INFORMATION

- Do not fill with highly corrosive liquids or chemicals.
- Keep out of reach of children.
- Ensure the lid is securely fastened after filling to prevent spills.
- Avoid dropping the bottle, as this may damage the spout or cause dents.
- Hand wash is recommended for prolonged product life, although it is dishwasher safe.

## 4. PARTS LIST

The HERCHR Oil Dispenser Bottle consists of the following components:

- Stainless Steel Bottle Body (34oz capacity)
- Pouring Spout Assembly (with clear plastic spout)
- Dustproof Cap
- Silicone Sealing Ring (located inside the spout assembly)

## 5. SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Initial Cleaning:** Before first use, wash the bottle body, spout assembly, and dustproof cap with warm soapy water. Rinse thoroughly and allow to air dry completely.
3. **Assemble Spout:** Ensure the silicone sealing ring is properly seated within the spout assembly.
4. **Fill Bottle:** Unscrew the spout assembly from the bottle. Pour your desired liquid (oil, vinegar, etc.) into the wide opening. Do not overfill; leave some space at the top.
5. **Secure Spout:** Screw the spout assembly back onto the bottle body until it is finger-tight. Ensure it is securely sealed to prevent leaks.
6. **Place Dustproof Cap:** Place the dustproof cap over the spout when not in use.

## 6. OPERATING INSTRUCTIONS

1. **Remove Cap:** Lift the dustproof cap from the spout.
2. **Pouring:** Gently tilt the bottle to dispense the liquid. The long spout is designed for controlled pouring, allowing you to manage the flow rate.
3. **Stop Pouring:** Return the bottle to an upright position. The non-drip design will minimize residual drips.
4. **Replace Cap:** After use, place the dustproof cap back onto the spout to keep it clean.

## 7. MAINTENANCE

- **Regular Cleaning:** Clean the bottle and spout assembly regularly, especially when changing contents or if residue builds up.
- **Hand Washing:** For best results and to preserve the finish, hand wash with warm soapy water. Use a bottle brush for the interior if needed.
- **Dishwasher Use:** The bottle is dishwasher safe, but frequent dishwasher use may affect the exterior finish over time.
- **Drying:** Ensure all parts are completely dry before reassembly and refilling to prevent moisture buildup.
- **Spout Care:** Periodically check the clear plastic spout for any blockages and clean as necessary. Ensure the silicone sealing ring is intact and properly seated.

## 8. TROUBLESHOOTING

| Problem                             | Possible Cause  | Solution  |
|-------------------------------------|---|---|
| Liquid leaks from the spout or lid. | <ul style="list-style-type: none"> <li>◦ Lid not tightened properly.</li> <li>◦ Silicone sealing ring is misplaced or damaged.</li> <li>◦ Bottle overfilled.</li> </ul> | <ul style="list-style-type: none"> <li>◦ Ensure the spout assembly is securely screwed onto the bottle.</li> <li>◦ Check the silicone ring for proper seating or damage. Replace if necessary.</li> <li>◦ Reduce the liquid level to below the neck of the bottle.</li> </ul> |

| Problem                                | Possible Cause  | Solution   |
|--|---|--|
| Liquid pours too slowly or is blocked. | <ul style="list-style-type: none"> <li>◦ Spout is clogged with residue.</li> <li>◦ Air vent in the spout is blocked.</li> </ul> | <ul style="list-style-type: none"> <li>◦ Clean the spout thoroughly, ensuring no residue remains.</li> <li>◦ Check the small air vent hole on the spout assembly and clear any blockages.</li> </ul> |
| Bottle feels unstable.                 | <ul style="list-style-type: none"> <li>◦ Uneven surface.</li> <li>◦ Base is dirty.</li> </ul>                                   | <ul style="list-style-type: none"> <li>◦ Place the bottle on a flat, stable surface.</li> <li>◦ Clean the anti-slip base of the bottle.</li> </ul>   |
